¹ Data exclude switching and terminal companies beginning 1910. Class III roads are excluded in 1913. Exclusion of the latter has practically no effect on the comparability of the figures. Information for 1914 is incomplete, as 20 of the larger railways did not report, and is not shown.

² Calculated for all classes of employees, including those not paid on an hourly basis.

³ Data cover Federal reports, reports of companies not under Federal control, and corporate reports.

Source: Interstate Commerce Commission; annual report, Statistics of Railways in the United States. See last paragraph of general note, p. 476, regarding current data.

No. 528.—STEAM RAILWAYS (CLASS I)—NUMBER AND COMPENSATION OF EMPLOYEES, BY DISTRICTS AND BY CLASS: 1942 AND 1943

No. 530.—STEAM RAILWAYS (ALL REPORTING COMPANIES)—CAPITALIZATION:
1890 TO 1943

NOTE.—All amounts except "per mile of road" in millions of dollars. Switching and terminal companies excluded beginning with 1910; their total capitalization in 1943 was \$792,389,365. Figures include both operating and nonoperating railways. The gross figures include considerable amounts of securities held by the companies issuing them as well as larger amounts held by other railway companies.

YEAR	TOTAL CAPITALIZATION				HELD BY RAILROADS		NET CAPITALIZATION

No. 531.—STEAM RAILWAYS—STOCK OUTSTANDING, DIVIDENDS, AND INTEREST:
1891 TO 1943

NOTE.—Data relate to years ending June 30 prior to 1916 and to calendar years thereafter. Nonoperating as well as operating roads are included. Switching and terminal roads are excluded beginning with 1908. Dividend figures throughout cover all classes of roads, but interest figure for 1913 excludes the unimportant class III roads. The amount of stock shown in the first column is exclusive of stock held by the issuing company, but includes that held by other railway companies.

¹ Prior to 1925 figures include investment of leased lines and exclude investment of proprietary companies not rendering annual reports. Beginning with 1925, the investment in road and equipment of proprietary companies is included as follows: 1925, \$490,216,000; 1926, \$831,574,000; 1927, \$919,096,000; 1928, \$1,013,752,000; 1929, \$1,061,469,000; 1930, \$1,095,631,000; 1931, \$1,114,637,000; 1932, \$1,121,945,000; 1933, \$1,068,264,000; 1934, \$890,581,000; 1935, \$861,716,000; 1936, \$861,696,000; 1937, \$848,173,000; 1938, \$840,033,000; 1939, \$835,848,000; 1940, \$809,391,000; 1941, \$818,060,000; 1942, \$803,280,000; 1943, \$858,312,000. No allowance is made for cash and material and supplies, and no deduction is made for depreciation.

² Does not include returns for lessor companies.

³ Does not include returns for class II and class III companies.

No. 584.—STEAM-RAILWAY FREIGHT SERVICE—TRAIN MILES, CAR MILES, TONNAGE AND RELATED AVERAGES: 1891 TO 1943

NOTE.—Figures prior to 1916 relate to years ended June 30, thereafter to calendar years. Switching and terminal roads excluded beginning with 1908, except as noted. The tonnage "per loaded car" for "all roads" is based on revenue tonnage only; and for "Class I roads" on revenue and nonrevenue tonnage. Tons are of 2,000 pounds.

¹ Figures for 1936 and prior years are not strictly comparable with those for subsequent years due to change in train classifications. ² Data are for class I roads including switching and terminal companies.

³ Beginning with 1917 data available for class I roads only.

Source: Interstate Commerce Commission; annual report, Statistics of Railways in the United States. See last paragraph of general note, p. 470, regarding current data.

No. 535.—STEAM-RAILWAY FREIGHT SERVICE—TONS CARRIED, TON MILES, REVENUE, AND AVERAGE HAUL: 1901 TO 1943

NOTE.—Figures before 1916 relate to years ended June 30; thereafter to calendar years. Switching and terminal roads excluded beginning with 1931. Tons are of 2,000 pounds.

CLASS AND YEAR OR YEARLY AVERAGE	TONS OF REVENUE FREIGHT CARRIED (THOUSANDS)		TONS CARRIED 1 MILE (MILLIONS)		Revenue ton-miles per mile of road	AVERAGE HAUL, REVENUE FREIGHT (MILES)		FREIGHT REVENUE	
	Originated	Total	Revenue freight	Revenue and non-revenue		System	Individual road	Amount (1,000 dollars)	Per ton-mile (cents)

No. 538.—STEAM RAILWAYS—REVENUES, EXPENSES, AND INCOME: 1901 TO 1943

NOTE.—Data relate to years ended June 30 prior to 1914, to calendar years thereafter. The methods calculating net revenue and net operating income is more fully shown in table 539. Switching and terminal companies are excluded beginning with 1905, operating revenues of switching and terminal companies, 1939, \$60,296,000; 1940, \$104,577,000; 1941, \$126,984,000; 1942, \$143,429,196; 1943, \$149,845,400; operating expenses, 1939, \$59,634,000; 1940, \$66,646,000; 1941, \$91,726,000; 1942, \$93,921,000; 1943, \$107,529,851.

CLASS AND YEAR OR YEARLY AVERAGE	Average miles of line (first track) operated	INCOME ACCOUNT ITEMS (THOUSANDS OF DOLLARS)					PER MILE OF LINE		Percent operating expense of revenue
		Operating revenues	Operating expenses	Net revenue from operations	Tax accruals	Net railway operating income	Operating revenues	Net revenue from operations

No. 542.—STEAM RAILWAYS—REVENUE FREIGHT ORIGINATED AND CARRIED, BY COMMODITY GROUPS, ALL ROADS, 1906 TO 1915, CLASS I ROADS, 1916 TO 1943

NOTE.—All figures in thousands of tons of 2,000 pounds. Data relate to years ended June 30 prior to 1944 to calendar years thereafter. Switching and terminal roads excluded beginning with 1908. Figures for 1911 to 1915, inclusive, exclude class III roads but this affects the comparability very slightly; those for 1916 exclude both class II and class III, thereby reducing the grand total about 6 percent. Non-revenue freight is excluded; this is a large item in the case of a few commodities, notably coal.

CLASS OF ROAD AND YEAR OR YEARLY AVERAGE	Total	Products of agriculture	Animals and prod- ucts	PRODUCTS OF MINES		Products of forests	MANUFACTURES AND MISCELLANEOUS	
				Coal and coke	Other		Carload ship- ments	Less than carload

No. 543.—STEAM-RAILWAY ACCIDENTS—NUMBER OF PERSONS KILLED AND INJURED, BY STATUS: 1891 TO 1943

NOTE.—For various reasons, including the fact that returns were required under different acts, the statistics are not strictly comparable. Prior to 1921, train accidents were those causing damage to railway property in excess of \$150 or any damage and a resulting casualty. Thereafter they were considered as such when the damage exceeded \$150 with or without a casualty. Where the damage is less than \$150 and there is a reportable casualty it is classified as a train-service accident. Figures for years 1911-1915 include industrial and other nontrain accidents to employees only, and for years 1906-1910 do not cover switching and terminal roads. Otherwise the statement covers all reportable accidents, including those due to suicide, mental derangement, and attempting to escape custody.

No. 548.—ELECTRIC RAILWAYS—SUMMARY: 1890 TO 1937

NOTE.—The census of street railways, which was first taken in 1890, and which has been taken at quinquennial intervals through 1937 beginning with the inquiry for 1902, covers (1) all street railways, without regard to kind of motive power, and (2) all interurban railways using other than steam as motive power. The nonelectric railroads included are those operated principally by cable and gasoline engines. Operations of electrified divisions of steam-railway companies are not included. Figures in this table do not include data for motorbus and trolley-bus operations of electric street railways. (For motorbus and trolley-bus statistics from census reports, see source.)

¹ Excludes data for 22 companies, operating on a part-year basis. These companies reported 36,810,221 passengers; 9,108,009 car-miles; 1,042,866 car-hours; \$2,398,295, operating revenue; and \$2,412,010, operating expense.

² Includes certain companies in Pennsylvania which maintained separate organizations, though controlled through stock ownership by other companies. For 1912 these companies were treated as merged and not included in the number reported.

³ Includes small mileage of track lying outside United States.

⁴ Data incomplete. Some of the companies engaged in both light-and-power and electric-railway operations were unable to report separately the values of plant and equipment assignable to their railway activities.

⁵ Number reported as of June 30, for 1890, 1922, 1927, and 1932; for 1902, average for the year; for 1912, as of Sept. 16. Figures for 1937 represent an average of numbers reported on June 30 and Dec. 31.

⁶ Includes 234 trolley-bus operators.

⁷ Includes 29,721,000 trolley-bus passengers.

⁸ Includes auxiliary operating revenues of \$8,906,000 for 1927 and \$91,242,000 for 1932; auxiliary expenses, \$7,822,000 for 1927, and \$49,232,000 for 1932. Data for operating revenues and operating expenses of auxiliary operations excluded so far as possible for earlier years.

Source: Department of Commerce, Bureau of the Census; Census of Electrical Industries, report on Street Railways and Trolley-Bus and Motorbus Operations. Survey discontinued.

No. 549.—TRANSIT INDUSTRY—SUMMARY: 1930 TO 1943

[Data represent the entire transit industry comprising all organized local passenger transportation agencies except taxicabs and suburban railroads. Data are based on financial and statistical reports received by the American Transit Association from transit companies representing 85 to 95 percent of the industry. The total number of operating companies as of Dec. 31, 1943 was 845]

¹ Amortization represents a very small part of this total.

² Does not include Federal or State income taxes.

³ Withdrawals of sole proprietors and partners.

⁴ Based on 634 carriers in 1939 and 643 carriers in 1940.

⁵ Does not include drivers of equipment engaged by these carriers to perform "purchased transportation."

⁶ Includes 19,010 collection and delivery employees, separately reported in 1942; compensation, \$34,861,004.

⁷ Based on 803 carriers.

⁸ Based on 924 carriers.

⁹ Based on 1,019 carriers.

¹⁰ Based on 1,063 carriers.

¹¹ Includes duplications on account of tonnage received from connecting motor carriers.

¹² Figures for 1939 and 1940 are based on 535 and 600 carriers, respectively; they do not include carriers which reported expense for "purchased transportation" in excess of 5 percent of total "operation and maintenance" expenses.

¹³ Basic figures include expenses of operating vehicles in intercity and local services; these expenses are not separable. Comparisons of revenue and expense per intercity vehicle-mile are therefore subject to qualification.

Miles per vehicle ⁹	66,147	73,004	70,217	72,636
Average fare per passenger, per carrier, intercity service ¹	\$0.877	\$0.843	\$0.829	\$0.800
Passenger revenue per vehicle-mile ¹				
Regular route intercity.....	.229	.227	.308	.356
Special, charter, and sightseeing services.....	.317	.344	.349	.332
Local service.....	.225	.193	.241	.301
Expense per vehicle-mile.....	.198	.203	.216	.234

¹ Local passenger revenue and baggage, mail, express, newspaper, miscellaneous station and terminal, and other operating revenue.

² Amortization represents a very small part of this total.

³ Does not include Federal or State income taxes.

⁴ Withdrawals, small in amount, of sole proprietors and partners.

⁵ Total vehicles owned at close of year.

⁶ Includes bus-miles of vehicles operated under "purchased transportation arrangements."

⁷ Data reported by 142 and 134 carriers in 1939 and 1940, respectively.

⁸ Includes only service on local and suburban runs of preponderantly intercity carriers.

⁹ Averages are for regular route intercity service and are for owned vehicles only in 1940 and owned and leased vehicles in 1939, 1941, and 1942.

¹ Figure for 1940 covers owned vehicles only; figures for other years include leased vehicles and vehicles operated under "purchased transportation arrangements."

² Number of vehicles operated in regular-route intercity service.

³ Total includes vehicles operated in local service and exclusively in special, charter, or sightseeing service. The latter vehicles are not included in any figures shown for 1941. Combination bus-truck vehicles and vehicles operated exclusively in baggage, mail, etc., service are not included in any year.

SELECTED OPERATING STATISTICS, BY REGIONS: 1939 TO 1942

¹ Domestic, international, and territorial; see note 4. ² Domestic. ³ Data not available.

⁴ Domestic air carriers operate within the continental limits of the United States; international and territorial operations cover activities of American air carriers in foreign countries and territories of the United States. ⁵ Beginning with 1938, excludes data for companies cited in note 7.

⁶ Includes operation and office personnel, and beginning with 1936, stewards and stewardesses.

⁷ Beginning with 1936, excludes operations of the following affiliated companies of Pan American Airways System: Cia Mexicana de Aviacion, S. A., Cia Nacional Cubana de Aviacion, and Panair do Brasil, for which operations are included in prior years.

⁸ All data, except airplane-miles flown, are as of Dec. 31. ⁹ Long line teletypewriter equipped.

¹ Class I airports are for the private owner of smaller type aircraft, class II, private owners of larger type aircraft and feeder transport aircraft; class III, present day transport aircraft, class IV and V, largest aircraft now in use and those planned for the immediate future.

² Indicates airports which exist but do not come up to Class I standards.

³ Includes Army, Navy, Army Operated and Navy Operated (the latter two are municipal or commercial airports temporarily taken over by the Army or Navy), C. A. P., miscellaneous Government and private.

⁴ Includes 1 unlighted C. A. A. intermediate field.

19. Waterways, Water Traffic, and Shipping

[Data in this section cover the following areas unless otherwise indicated: From Board of Engineers of the United States Army, Bureau of Census, Bureau of Customs, and Bureau of Foreign and Domestic Commerce, United States customs area which includes Alaska, Hawaii, and Puerto Rico, and, from Jan. 1, 1935, through Dec. 31, 1939, Virgin Islands; from United States Maritime Commission, continental United States.]

General note as to units of measurement.—"Cargo tonnage" represents weight of cargo in long tons (2,240 pounds) or short tons (2,000 pounds). All other tonnage figures refer to capacity of vessels. The terms gross and net tonnage refer to space measurement, 100 cubic feet being called 1 ton. Gross tonnage is the capacity of the entire space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers or crew, with certain minor exemptions. Net or registered tonnage is what remains after deducting from the gross tonnage the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship recorded as "entered with cargo" may bear little relation to actual weight of cargo. Dead weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is therefore the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety. Displacement tonnage (naval vessels) has reference to weight of the vessel itself with its normal equipment, fuel, etc.

NO. 559.—WATER-BORNE COMMERCE OF THE UNITED STATES—CARGO TONNAGE, FOREIGN AND DOMESTIC: 1938 TO 1943

[In thousands of short tons of 2,000 pounds]

CLASS	1938	1939	1940	1941	1942	1943

Approximate net total, domestic ⁴	361, 718	456, 733	496, 646	532, 948	490, 679	453, 296

¹ Comprises the following with figures for 1943: Harbor traffic of New York, Philadelphia, and San Francisco, 54,883,000 tons; local traffic of other seaports, 45,139,000; local traffic of lake ports, 6,256,000.

² Excluding St. Marys Falls Canal traffic (115,578,000 tons in 1943) and additional Detroit River traffic (16,754,000 in 1943), data for which are already included in figures for Great Lakes traffic; also excluding duplications relating to rivers and canals themselves.

³ Principally coastwise and lake traffic passing through canals and connecting channels other than the St. Marys Falls Canal and the Detroit River.

⁴ Estimated from figures in this table on assumption that all deductions represent duplications in domestic traffic. There are, however, some minor duplications in figures for foreign traffic.

Source: War Department, United States Army, Office of the Chief of Engineers, Annual Report, Part II.

No. 560.—COMMERCE OF PRINCIPAL UNITED STATES OCEAN PORTS: 1943

[In thousands of short tons of 2,000 pounds. In addition to the commerce here shown, many of the ports have (1) commerce with ports on internal rivers and canals; (2) purely local port traffic, including, in the case of New York, Philadelphia, and San Francisco, what is called intraport traffic between parts of a harbor for which separate statistics are maintained. These forms of traffic, although the aggregate tonnage is large, are of much less economic importance than foreign and coastwise traffic.]

¹ Sailing vessels, canal boats, and barges.

² The decrease of tonnage arises principally from the registered tonnage having been corrected in 1818, 1829, and 1830 by striking off all vessels the registers of which were granted prior to 1815, which were supposed by the collectors to have been lost at sea, captured, etc.

³ Figures as of Dec. 31 are latest available for publication. Later data, compiled by Treasury Department, Bureau of Customs, were not published during war period.

⁴ Including Puerto Rico and Virgin Islands.

⁵ Including Hawaii and Alaska.

⁶ Not available.

No. 572.—MERCHANT MARINE OF THE WORLD AND OF THE UNITED STATES

NOTE.—Vessels of 100 tons and over. Prior to 1919 tonnage figures are gross for steamers and net for sailing vessels, thereafter gross for both. Wooden vessels on the Great Lakes and vessels on the Caspian Sea are not included. Japanese sailing vessels and most sailing vessels belonging to Greece, Turkey, and southern Russia are not included. Figures for Philippine Islands are included with United States beginning with 1910. See general note, p. 501. Later figures not compiled during war period.

² Principally from operation of shops and docks.

³ After deduction of canal earnings repaid to appropriations.

⁴ No interest charge against the Canal is actually made by the Treasury. In order to present the net results of the operation of the Canal, the interest on capital invested is computed at a rate considered reasonable for Government borrowings over an indefinite period. Computed interest prior to July 12, 1922, is included in capital investment account.

⁵ Deficit.

No. 576.—MARINE WRECKS AND CASUALTIES OCCURRING TO VESSELS OF THE UNITED STATES, 1921 TO 1943, AND BY REGIONS, 1940 TO 1943

NOTE.—This table covers disasters and casualties resulting in damage or loss amounting to \$300 or more. Figures exclude data for some casualties to U. S. vessels reported after closing of records for respective years. No data included for casualties to U. S. vessels in Panama Canal Zone. Figures for such casualties in 1941 are as follows: Vessels involved, 1; tonnage, 6,171; property loss, \$50,000; persons on board, 40; no loss of life. No casualties reported in Panama Canal Zone in 1942 and 1943.

YEARLY AVERAGE OR YEAR ENDED JUNE 30	NUMBER OF VESSELS		VESSEL CAPAC- ITY—1,000 TONS		LOSSES—1,000 DOLLARS		PERSONS ON BOARD		Lives lost

¹ Year ended Sept. 30.

² Average for period July 1, 1915, to Dec. 31, 1920.

³ Average for period July 1, 1914, to Dec. 31, 1920. Shown because of marked effect of World War I on shipping.

Not including British Honduras.

20. Foreign Commerce of the United States

General note.—All foreign trade statistics in this section were compiled by the Department of Commerce, Bureau of the Census beginning May 1941. Prior to that time the statistics were compiled by the Bureau of Foreign and Domestic Commerce. Annual statistics on foreign trade appear in the report, *Foreign Commerce and Navigation*, and monthly data appear in the *Monthly Summary of Foreign Commerce of the United States*. The release of current statistics to the public is governed by wartime security regulations which were considerably relaxed at the end of the war in Europe. In general, except for imports and exports of military, strategic, and critical commodities, statistics on foreign trade may be published 60 days after the close of the period to which they relate. Except as noted (as, for example, in table 617) the values stated are in United States dollars without reference to changes in the gold content of the dollar. (The statutory price of gold—\$20.67 per ounce—in effect prior to Jan. 31, 1934, was changed on that date by Executive Order to \$35 per ounce. Between Mar. 10, 1933, and Jan. 31, 1934, the foreign exchange value of the dollar was permitted to depreciate as a result of the restriction placed on gold shipments to foreign countries.) The geographic area covered by these statistics, except as noted, is the United States customs area, which includes Alaska, Hawaii, and Puerto Rico, and from Jan. 1, 1935, through Dec. 31, 1939, the Virgin Islands (see headnote, table 596). Other explanations of the trade tables are given in the introduction to the annual report, *Foreign Commerce and Navigation of the United States*.

No. 590.—EXPORTABLE GOODS, PRODUCTION AND PROPORTION EXPORTED: 1909 TO 1943

[Agricultural production is gross income, excluding feed, seed, and waste. Manufactures represent value added by manufacture—census data through 1939 and approximations thereafter. Value of mine products in 1909, 1919, and 1939 are census figures, in 1929 census data plus petroleum products, and in other years, estimates based on data of the Bureau of Mines. As the figures are not adjusted for price changes, the increase or decrease in absolute values from period to period should be disregarded.]

[Amounts in millions of dollars]

No. 591.—EXPORTS AND IMPORTS OF MERCHANDISE: 1791 TO 1944

NOTE.—All figures in thousands of dollars. For basis of dollar values, see general note, p. 524. Figures are for fiscal years ended Sept. 30, 1791 to 1842, and June 30, 1843 to 1915; calendar years thereafter. For calendar years 1900-15 and fiscal years 1928-44, see table 593. For total exports and imports by year prior to 1902, see table 594. Figures include gold and silver prior to 1821.

¹ Includes gold and silver prior to 1821.

² Period beginning Oct. 1, 1842, and ending June 30, 1843.

No. 595.—EXPORTS AND IMPORTS OF MERCHANDISE, PER CAPITA: 1791 TO 1948

NOTE.—Export figures for 1791 to 1820 are based on total exports including reexports (the latter were then relatively large) and for 1821 to date, on exports of United States merchandise only, shown in table 591. Import figures for 1791 to 1820 are based on general imports shown in table 591, for 1821 to 1870, total imports less reexports, and for 1871 to date, imports for consumption, shown in table 620.

No. 601.—EXPORTS OF UNITED STATES MERCHANDISE

NOTE.—All figures in thousands of dollars. For basis of dollar values, see general note, p. 531. Inset footnotes. Figures cover years ended Sept. 30, 1931 to 1940, and June 30, 1880 to 1915; calendar year the United States. Owing to the special influence of the war on the character of our trade, averages for

YEAR BY AVERAGE OR YEAR	EXPORTS OF UNITED STATES MERCHANDISE

UNITED STATES MERCHANDISE AND IMPORTS—INDEXES (PRICE), AND TOTAL VALUE: 1913 TO 1942

have been constructed by the so-called "ideal formula," quantities of the several articles as weighting factors of . . . About 265 commodities were included in the direct . . . was then assumed that the prices of articles in each . . . parallel with those of articles covered and their value, . . . included in the aggregative totals from which the quantity . . . of quantity and unit value of total exports and imports . . . totals of the classes. In constructing the indexes the data for . . . subsequent year was compared with that preceding. The . . . into a series by the chain method.

1923-25 average=100]

* Excludes "lard compounds" beginning 1921, now classified as "vegetable cooking oils."

* Includes semimanufactures.

MERCHANDISE—VALUE OF SELECTED ARTICLES: 1891 TO 1942

Figures for these years are mixed gold and currency values. Figures are for fiscal years ended Sept. 30 unless blanks represent entire absence of trade; in other cases the item was not segregated.

Units of dollars:

Cotton, unmanu- factured	Cotton, manu- factured	Iron and steel products	Other wood manu- factures	Coal and oil	Petro- leum and prod- ucts	Iron and steel manu- factures	Copper and manu- factures	Mach- inery, all classes	Auto- mobiles and parts	YEAR OR TRIMLY AVERAGE

Includes fur hats beginning 1921, formerly classified as miscellaneous textile products.

Includes syrups and maple sugar prior to Oct. 4, 1913.

Saltwater transferred to fertilizers from chemicals beginning 1921.

Includes semimanufactures.

Includes sundries.

SELECTED COMMODITIES: 1821 TO 1942

1933, "imports for consumption" thereafter, except as indicated in footnotes. Figures cover fiscal year. In some cases blanks represent entire absence of trade; in other cases the item was not segregated.

¹ See headnote regarding grain shipped through Canada to Europe.

IMPORTS OF MERCHANDISE, BY CONTINENTS: 1821 to 1942

cover fiscal years to and including 1915; calendar years thereafter, except as noted. See headnote, table 801. Turkey in Europe is with Asia beginning 1926; the U. S. S. R. in Asia is with Europe beginning 1934; adjusted for grain shipments to Canada which were actually in transit to Europe are shown in table 496 were especially large in the period 1920-1929 and the year 1938.

GENERAL IMPORTS								YEARLY AVERAGE OR YEAR

No. 614.—EXPORTS (INCLUDING REEXPORTS) BY CONTINENTS, COMMERCIAL REGIONS, AND COUNTRIES: 1926 TO 1942

[Because of changes in the grouping and the classification of countries effective January 1, 1942, continent and geographical area totals appearing in this table may differ from corresponding totals reported in previous issues of the Statistical Abstract. The country sequence within each geographical area is from north to south and west to east, rather than alphabetic as in former years. In the case of some countries, especially those having no seaports, there is considerable indirect trade by way of other countries, this being usually larger in the case of our exports to them than of our imports from them; for such countries the apparent balance of trade may be far from the true balance. A marked case of indirect trade is that of grain exported through Canada (mostly via Montreal) to Europe and reported as exported to Canada. Such grain shipments were especially large in the period 1920-29 and in 1933. Adjusted figures in which the grain is deducted from exports to Canada and North America and included in exports to Europe are given in table 495 of the 1935 Statistical Abstract and the Trade Promotion Bulletin Nos. 196 and 215. Figures are for calendar years.]

¹ See headnote concerning indirect trade.² Panama Canal Zone included with Republic of Panama prior to 1938.³ Average for 3 years.⁴ Bahamas, Leeward and Windward Islands known as "Other British West Indies" prior to 1942.⁵ Treated as a customs district of the United States from Jan. 1, 1935 through Dec. 31, 1939. For trade of the Virgin Islands with the United States and with foreign countries beginning 1935, see table 629.⁶ Average for 4 years.⁷ For statistical purposes, trade with Germany includes (as far as ascertainable) trade with German-occupied areas from the following dates: Austria, May 6, 1938; Sudeten area of Czecho-Slovakia, Nov. 10, 1938; other Czecho-Slovak provinces (Protectorate of Bohemia-Moravia and part of Slovakia), Mar. 18, 1939; Memel territory of Lithuania, Mar. 25, 1939; and Danzig and the German-occupied parts of Poland, Nov. 16, 1939. Similarly, trade with the Czecho-Slovak area occupied by Poland is included with the Polish trade from Dec. 30, 1938, to Nov. 16, 1939, while trade with that area of Czecho-Slovakia occupied by Hungary is included with that country's trade after Dec. 30, 1938, and Mar. 19, 1939, for the respective portions of Ruthenia and part of Slovakia occupied by Hungary on those dates. Trade with U. S. S. R. includes trade with that part of Poland occupied by U. S. S. R. after Nov. 1939.⁸ Exports shown to countries with which the United States was at war, or to areas controlled by such countries, are shipments to prisoners of war, relief agencies, or neutral embassies, or shipments which left the United States prior to the beginning of hostilities or the occupation of the area by the enemy.⁹ Less than \$500.¹⁰ Madeira Islands (Africa—Western area) and Azores (Europe—Southwestern area) shown as Azores and Madeira Islands (Europe—Southwestern area) prior to 1942.¹¹ Malta and Gozo (Europe—Southwestern area) and Cyprus (Europe—Southeastern area) shown as Malta, Gozo and Cyprus (Europe—Southeastern area) prior to 1942.¹² Palestine and Trans-Jordan included with Syria prior to 1930.¹³ Iraq included with Arabia Peninsula States prior to 1930.¹⁴ Data for Hadhramaut, reported in Arabia Peninsula States prior to 1942, included with Aden beginning 1942.¹⁵ State of Bahrain and Afghanistan (Asia—Western area) included with Southern and Southeastern Asia, n. e. s. prior to 1942.¹⁶ Burma included with India and Dependencies prior to 1938.¹⁷ Japanese Mandated Islands (Australia and Oceania) included with Japan (Asia—Eastern area) prior to 1942.¹⁸ Tangier included with French Morocco (formerly reported as "Morocco") prior to 1942.¹⁹ Spanish Morocco (Africa—Northern area) and Rio de Oro and Spanish Guinea (Africa—Western area), known as "Other Spanish Africa" (Africa—Western area) prior to 1942.²⁰ Libya (Africa—Northern area) included with Eastern Italian Africa (Africa—Eastern area) prior to 1942.²¹ Cameroon, French Equatorial Africa and French West Africa (Africa—Western area) and French Somaliland (Africa—Eastern area) known as "Other French Africa," n. e. s. (Africa—Western area) prior to 1942.²² Gold Coast, Nigeria, St. Helena and Dependencies, and Gambia and Sierra Leone known as British West Africa prior to 1931.²³ St. Helena and Dependencies and Gambia and Sierra Leone known as "Other British West Africa" 1931 through 1941.²⁴ Cape Verde Islands and Portuguese Guinea and Angola known as "Other Portuguese Africa" prior to 1942.²⁵ Data for Nyassaland, reported in "Other British South Africa" (Africa—Southern area) prior to 1942, included with British East Africa (Africa—Eastern Area) beginning 1942.²⁶ Union of South Africa, Northern Rhodesia, Southern Rhodesia, and Other British South Africa known as "British South Africa" prior to 1931.²⁷ Data for Basutoland and Swaziland reported in Union of South Africa prior to 1942, included under Southern British Africa beginning 1942.²⁸ Northern Rhodesia, Southern Rhodesia and Southern British Africa known as "Other British South Africa" 1931 through 1941.

¹ See headnote, table 614, concerning indirect trade.

² Panama Canal Zone included with Republic of Panama prior to 1938.

³ Average for 3 years.

⁴ Bahamas, Leeward, and Windward Islands known as "Other British West Indies" prior to 1942.

⁵ Treated as a customs district of the United States from Jan. 1, 1935, through Dec. 31, 1939. For trade of the Virgin Islands with the United States and with foreign countries beginning 1935, see table 620.

⁶ Average for 4 years.

⁷ For statistical purposes, trade with Germany includes (as far as ascertainable) trade with German-occupied areas from the following dates: Austria, May 6, 1938; Sudeten area of Czecho-Slovakia, Nov. 10, 1938; other Czecho-Slovak provinces (Protectorate of Bohemia-Moravia and part of Slovakia), Mar. 18, 1939; Memel territory of Lithuania, Mar. 25, 1939; and Danzig and the German-occupied parts of Poland, Nov. 16, 1939. Similarly, trade with the Czecho-Slovak area occupied by Poland is included with the Polish trade from Dec. 30, 1938, to Nov. 16, 1939, while trade with that area of Czecho-Slovakia occupied by Hungary is included with that country's trade after Dec. 30, 1938, and Mar. 19, 1939, for the respective portions of Ruthenia and part of Slovakia occupied by Hungary on those dates. Trade with U. S. S. R. includes trade with that part of Poland occupied by U. S. S. R. after Nov. 1939.

⁸ Madeira Islands (Africa—Western area) and Azores (Europe—Southwestern area) shown as Azores and Madeira Islands (Europe—Southwestern area) prior to 1942.

⁹ Less than \$500.

¹⁰ Malta and Gozo (Europe—Southwestern area) and Cyprus (Europe—Southeastern area) shown as Malta, Gozo and Cyprus (Europe—Southeastern area) prior to 1942.

¹¹ Palestine and Trans-Jordan included with Syria prior to 1930.

¹² Iraq included with Arabia Peninsula States prior to 1930.

¹³ Data for Hadhramaut, reported in Arabia Peninsula States prior to 1942, included with Aden beginning 1942.

¹⁴ State of Bahrein and Afghanistan (Asia—Western area) included with Southern and Southeastern Asia, n. e. s. prior to 1942.

¹⁵ Burma included with India and Dependencies prior to 1938.

¹⁶ Japanese Mandated Islands (Australia and Oceania) included with Japan (Asia—Eastern area) prior to 1942.

¹⁷ Tangier included with French Morocco (formerly reported as "Morocco") prior to 1942.

¹⁸ Spanish Morocco (Africa—Northern area) and Rio de Oro and Spanish Guinea (Africa—Western area), known as "Other Spanish Africa" (Africa—Western area) prior to 1942.

¹⁹ Libya (Africa—Northern area) included with Eastern Italian Africa (Africa—Eastern area) prior to 1942.

²⁰ Cameroon, French Equatorial Africa and French West Africa (Africa—Western area) and French Somaliland (Africa—Eastern area) known as "Other French Africa," n. e. s. (Africa—Western area) prior to 1942.

²¹ Gold Coast, Nigeria, St. Helena and Dependencies, and Gambia and Sierra Leone known as British West Africa prior to 1931.

²² St. Helena and Dependencies and Gambia and Sierra Leone known as "Other British West Africa" 1931 through 1941.

²³ Cape Verde Islands and Portuguese Guinea and Angola known as "Other Portuguese Africa" prior to 1942.

²⁴ Data for Nyassaland, reported in "Other British South Africa" (Africa—Southern area) prior to 1942, included with British East Africa (Africa—Eastern area) beginning 1942.

²⁵ Union of South Africa, Northern Rhodesia, Southern Rhodesia, and "Other British South Africa" known as "British South Africa" prior to 1931.

²⁶ Data for Basutoland and Swaziland, reported in Union of South Africa prior to 1942, included under Southern British Africa beginning 1942.

²⁷ Northern Rhodesia, Southern Rhodesia and Southern British Africa known as "Other British South Africa" 1931 through 1941.

¹ As reported to Treasury Department by collectors of customs, subject in certain cases to subsequent refund as well as drawback. These figures are somewhat higher than duties as calculated on the basis of imports for consumption, as shown in table 620.

² Duties less cost of collection into Puerto Rico and the Virgin Islands are turned into the Islands Treasury. Duties into the Virgin Islands are assessed under the tariff law of the Virgin Islands and

not under the tariff act of the United States.

³ Not included in total

⁴ Formerly San Antonio, changed to Laredo effective Dec. 22, 1939.

⁵ Iowa included with Chicago, beginning Sept. 22, 1939.

⁶ Utah and Nevada included with San Francisco effective Feb. 22, 1940.

Source: See general note, p. 524.

No. 617.—EXPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE, BY GROUPS OF CUSTOMS DISTRICTS: 1860 TO 1942

NOTE.—All figures in thousands of dollars. For basis of dollar values, except export figures for 1865 and 1870-78, see general note, p. 524. Export figures for those years represent mixed gold and currency values and hence do not agree with the specie values given for total exports in other tables. Figures cover fiscal years to and including 1915, calendar years beginning 1916. Import data are "general imports" through 1933; "imports for consumption" thereafter. Exports and imports of the interior districts, a small percentage of the total, are not included in this table.

Source: See general note, p. 524.

No. 418.—REPORTS (INCLUDING REEXPORTS) AND IMPORTS OF MERCHANDISE BY PRINCIPAL CUSTOMS DISTRICTS 1800 TO 1942

NOTE.—All figures in thousands of dollars. For basis of dollar values, except export figures for 1801 and 1870-79, see general note, p. 524. Export figures for those years represent mixed gold and currency values. Figures cover fiscal years to and including 1915, thereafter, calendar years. Import data are "general imports" through 1903, "imports for consumption" thereafter. Areas of districts were rearranged July 1, 1913. Prior to that date some of the districts were more restricted. However, in most cases this change only slightly affects the comparability of the figures. Prior to 1914 the statistics given in the table for Buffalo include the (former) districts of Buffalo Creek and Niagara, those for Michigan include the (former) districts of Superior, Huron, and Detroit, and those for Massachusetts and Maryland were the former districts of Boston and Baltimore, respectively.

No. 619.—IMPORTED DUTIABLE MERCHANDISE ENTERED FOR CONSUMPTION—VALUES, CALCULATED DUTIES, AND AVERAGE RATE OF DUTY, BY TARIFF SCHEDULES: 1918 TO 1943

NOTE.—All money figures in thousands of dollars (for basis of dollar values, see general note, p. 524). Data cover fiscal years through 1918, calendar thereafter. Articles on which countervailing and antidumping duties are assessed are included. Free list commodities taxable under Revenue Acts are excluded from the various schedules since 1931. Percents represent average ad valorem rate or ratio of duties to values of dutiable merchandise.

No. 620.—IMPORTS ENTERED FOR CONSUMPTION AND DUTIES THEREON: 1821 TO 1942

NOTE.—For basis of dollar values, see general note, p. 524. From 1821 to 1899, inclusive, the figures of import values represent total imports less reexports, and for 1907 and later years imports entered for consumption. The "ratio of duties to total" is based upon the values of imports shown in the table. Figures cover fiscal years ended Sept. 30, 1821 to 1842, and June 30, 1843 to 1915; calendar years thereafter.

YEARLY AVERAGE OR YEAR	VALUES				Duties calculated	RATIO OF DUTIES TO TOTAL		Amount duties per capita
	Total	Free	Dutiable	Percent free		Free and dutiable	Dutiable	
	1,000 dollars	1,000 dollars	1,000 dollars		1,000 dollars	Percent	Percent	Dollars

¹ Period July 1, 1915, to Dec. 31, 1920.

Source: See general note, p. 524.

No. 621.—IMPORTS OF MERCHANDISE, FREE AND DUTIABLE.

NOTE.—All figures in thousands of dollars. For basis of dollar values, see general note, p. 524. Figures are "general imports" through 1933; "imports for consumption" beginning 1934. The percentage of the dutiable general imports are reported as reexported than of the free general imports. Moreover, 1933, carpet wool used for making carpets and, for 1922 to 1928, wheat imported for milling in bond is. For adjusted figures see table 492 of the 1935 issue of the Statistical Abstract.

* Includes beverages.

* Period July 1, 1915, to Dec. 31, 1920.

* Fiscal years.

AND PERCENT FREE, BY ECONOMIC CLASSES: 1821 TO 1942

cover years ended Sept. 30, 1821 to 1840, and June 30, 1850 to 1918; calendar years thereafter, except as noted. free in general imports is normally slightly lower than in imports for consumption because relatively more in the period 1822-1833, there is an understatement of the free goods in general imports because, for 1822 to export were reported as dutiable when entered, although no duty was ultimately paid on these products.

21. Commerce of Territories and Possessions

GENERAL NOTE.—All statistics in this section, except as noted, were compiled by the Dept. of Commerce, Bureau of the Census beginning May 1941; prior to that time, data were compiled by the Bureau of Foreign and Domestic Commerce. These statistics appear in the Monthly Summary of Foreign Commerce of the U. S., December issue. Restrictions on the publication of these data were considerably relaxed at the end of the war in Europe. In general, except for imports and exports of military, strategic or critical commodities, statistics on foreign trade may be published sixty days after the close of the period to which they relate. In the general foreign trade statistics of the United States presented in the preceding section, the Philippines and Virgin Islands, except 1935 through 1939 for the Virgin Islands, are treated as foreign countries and their trade with the United States is included while their trade with other countries is not included. On the other hand, Puerto Rico, Hawaii, and Alaska, and for 1935-39, Virgin Islands are treated as internal parts of the United States, so that trade between them and continental United States is not included, while trade between them and foreign countries is included, each of these territories appear as a separate customs district. Neither trade of American Samoa and Guam with foreign countries or shipments between them and United States are included in the general tables on foreign trade. See table 596, p. 530.

The tables in this section present the total foreign trade of each of the United States Territories and possessions and show separately the trade with continental United States (unless otherwise indicated) and with foreign countries, including other United States Territories and possessions. For basis of table values, see general note, p. 524.

No. 624.—IMPORTS AND EXPORTS OF ALASKA: 1882 TO 1942

NOTE—In 1942 Alaska shipped domestic silver valued at \$35,040 to the United States.

¹ The discrepancy between the United States figures of exports to the Philippines prior to 1911 and the Philippine figures of imports from the United States in corresponding periods is due chiefly to the fact that the Philippine import figures prior to that year omit merchandise imported free of duty for the use of the Government or for use in construction and equipment of railways in the islands, under the act of Feb. 6, 1903, while the United States returns omit only Government supplies carried by Government vessels.

² Continental U. S. through 1936; includes outlying areas thereafter.

22. Irrigation and Drainage

[Data in this section relate to Continental United States]

No. 633.—IRRIGATION ENTERPRISES—SUMMARY: 1910 to 1940

NOTE.—Data are for the 17 Western States and Arkansas and Louisiana. Tables 633 to 643 relate to irrigation enterprises of all types, including those operated by individual farmers. They are based on reports of the management of the enterprises. An enterprise is defined as "an independent irrigation establishment and includes the works for supplying water and the land for which water is supplied, except that the cost and value of the land is not included in the capital invested."

ITEM		CENSUS OF—			
		1910	1920	1930	1940
Approximate land area.....	1000 acres.....	1,224,063	1,224,980	1,228,980	1,225,067
Farms (irrigated and nonirrigated).....	number.....	1,776,046	1,916,391	2,062,613	1,897,846
Land in all farms.....	1000 acres.....	416,463	506,441	588,604	690,060
Irrigation enterprises:					
Enterprises.....	number.....	56,868	63,298	75,617	91,637
Units irrigated.....	number.....	(¹)	(¹)	(¹)	430,623
Area irrigated.....	1000 acres.....	14,433	19,192	19,548	21,004
Area existing works were capable of supplying with water.....	1000 acres.....	20,286	26,020	24,103	28,066
Area irrigable.....	1000 acres.....	32,245	35,891	30,599	31,306
Additional area existing works were capable of supplying with water.....	1000 acres.....	5,852	6,829	6,554	7,062
Additional irrigable area in enterprises, not supplied with water.....	1000 acres.....	17,812	16,699	11,082	10,302
Investment in irrigation enterprises.....	1000 dollars.....	321,464	697,667	892,766	1,062,049
Increase over preceding census.....	percent.....	369.2	117.0	29.0	17.8
Average per acre based on area works were capable of supplying with water.....	dollars.....	15.85	26.81	34.20	37.60
Increase over preceding census.....	percent.....		69.1	24.4	9.6
Estimated completed cost of existing enterprises.....	1000 dollars.....	437,949	619,778	1,015,106	1,126,546
Average per acre based on irrigable area in enterprises.....	dollars.....	13.58	22.84	33.17	35.99
Average annual cost per acre irrigated for maintenance and operation of irrigation works.....	dollars.....	1.07	2.43	2.77	2.28

¹ Represents redeterminations and therefore differs from figures shown for earlier years.

² Not available.

³ Relates to total area in enterprises; irrigable areas not reported.

⁴ Does not include cost of operation and maintenance for rice growing districts in Gulf States; consequently figure is not comparable with those for later years.

¹ Acres shown under "Supplemental sources" are parts of areas shown under "Primary sources" and therefore are not added again into the total. ² Based on area works were capable of supplying with water.

³ Based on irrigated area in enterprises reporting cost of maintenance and operation.

⁴ Based on enterprises reporting both quantity and cost of water, assuming (a) that for enterprises serving 1 to 4 units the cost of water is cost of maintenance and operation, and for enterprises serving 5 or more units it is total annual charges, and (b) that enterprises reporting cost and quantity of water had used the same quantity of water per acre as all enterprises which reported water delivered.

¹ A farm reporting both irrigated and nonirrigated crops is recorded as one farm in the total.

² Not available.

³ Includes data for Lespedeza hay which is not shown separately.

⁴ Data available only for Arizona and California.

⁵ Computed by using acreages grown alone in all States except California, Idaho, Oregon, and Washington, where total acreages were used. ⁶ Running square bales of lint cotton, counting round as half bales.

¹ Warren Act contracts are those which provide for the sale of excess water to irrigation districts, i. e. water over and above project requirements. The lands served are usually located outside the project proper. The act also provides for joint construction and financing of irrigation works by the Federal Government and irrigation districts. ² Totals for all crops represent net areas after deducting areas subsequently used for other crops or pasture, detail is total area in cultivation, no deductions being made for duplicated areas. ³ Bales of 500 pounds each. ⁴ Payments received from Federal and commercial agencies.

Source: Department of Commerce, Bureau of the Census; Fifteenth and Sixteenth Census Reports Drainage of Agricultural Lands.

reporters, mostly farmers, report for their own and nearby farms on some 80 crops and scores of other items pertaining to agricultural production and farm family living.

The most extensive of the survey data are gathered by the Bureau of Agricultural Economics from questionnaires handled in cooperation with the Post Office Department through its rural mail carriers. These surveys obtain livestock data in June and December and crop acreage data in October. For each survey the rural carrier distributes 10 to 20 cards to farmers on his route. The farmer is asked to complete his questionnaire for his own farm and return the card to his mail box.

In the data prepared by the Bureau of Agricultural Economics, estimates of crop acreage and production for the census years are set up currently on available information. Later, if necessary, these data are revised to a level based largely on the census enumerations. The estimates for intercensal years are based on sample data obtained each year from individual reporters. This information is supplemented by other data, such as State assessors' enumerations of agricultural information, crop meter frontage measurements, reports of carlot shipments, warehouse receipts, local surveys, personal observations by field statisticians as well as reports from other sources having a knowledge of farming, agricultural production, and processing. Cotton acreage and production are also based on sample data and, in large measure, on ginning information gathered by the Bureau of the Census. Usually, all known sources of information pertaining to agriculture in general, from the farm to the consumer's household are tapped for basic facts used in compiling current statistics on agriculture.

Cash income is the cash receipts from farm marketings and represents the quantities of crops, livestock, and livestock products sold by farmers multiplied by the prices received per unit of production at the local market. Gross farm income includes Government payments, value of farm products consumed on the farm, rental value of farm homes, as well as cash receipts from farm marketings.

Information on prices received by farmers for products they sell and prices paid for articles they buy for production and family living are obtained from about 85,000 farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month when a particular crop harvest begins.

The index numbers of prices received and of prices paid by farmers consist of the aggregate value of a fixed quantity of goods, based on current midmonth prices for these commodities, expressed as a percentage of the aggregate value of the same quantity of goods in the base period. The ratio of the index of prices received to the index of prices paid by farmers measures the monthly variation in the per unit exchange value of farm products.

Data on imports and exports are now compiled by the Department of Commerce, Bureau of the Census, and are published in the annual Foreign Commerce and Navigation of the United States. (See section 20, Foreign Commerce of the United States.) The official trade statistics based on the fiscal year are usually preferable to data presented on a calendar year basis, for use in comparing imports and exports with crop production since, for most crops, they coincide more nearly with the crop year.

These general notes on agriculture apply also to the sections on farm production and related statistics, on farm animals and animal products, and on farm crops and food-stuffs, which follow this section.

No. 653.—POPULATION, FARMS, AND FARM PROPERTY—SUMMARY: 1850 TO 1940

NOTE.—Figures for 1850 relate to June 1, for 1910 to Apr. 15, for 1920, 1925, and 1935 to Jan. 1, and for 1930 and 1940 to Apr. 1, except that the classification of land according to use refers to the preceding year. Leaders indicate that data are not available.

¹ Estimates.

² For definition of urban and rural, see p. 2.

³ The 1930, 1935, and 1940 farm population comprises all persons living on farms without regard to occupation; the 1920 figures include also those farm laborers (and their families) who, while not living on farms, lived outside the limits of any incorporated place. A further difference is due to the fact that the 1920 and 1935 censuses were taken in January, while the 1930 and 1940 censuses were taken in April, when the number of persons on farms is appreciably larger. For farm population by States see table 12, p. 15.

⁴ Data collected for 1925 are not strictly comparable with figures for other years.

⁵ Includes cropland harvested, crop failure, cropland lying idle or fallow, and plowable pasture.

⁶ "Improved land"; figures nominally include land available for crops and land occupied by buildings, yards, and barnyards.

⁷ Value is of specified farm property, not all farm property.

⁸ Figures for land and for buildings are less satisfactory than figure for total real estate value; in other words, value of buildings should not be subtracted from total farm value and difference assumed to represent accurately market value of land alone. Figures for land include the value of fences, tile drains, and other incidental improvements on the land, excluding only the value of buildings.

⁹ Figures for 1910 exclude value of young animals when enumerated separately. For description of items for other years, see note 1 on "livestock," table 661, p. 606.

No. 663.—FARMS BY MAJOR SOURCE OF INCOME AND VALUE OF ALL FARM PRODUCTS: 1939

[Totals and the group "\$10,000 and over" are from complete tabulations of 1940 Census reports for individual farms; all other data are based upon a 2-percent sample of these reports, expanded and adjusted to agree with recorded totals. Figures marked with an asterisk (*) have a coefficient of variation of approximately 10 percent or more. Value of all farm products represents value of those sold, traded, or used by farm households]

No. 666.—NUMBER OF FARMS CROSS-CLASSIFIED BY TOTAL VALUE OF FARM PRODUCTS, 1939, AND TENURE OF FARM OPERATOR, APR. 1, 1940

[Totals for "All farm operators" are the 1940 Census recorded totals. For tenure groups, the totals are based upon a 2-percent sample of the reports for individual farms reporting less than \$10,000 value of all farm products plus a complete tabulation of the reports for farms reporting "\$10,000 and over" value of all farm products. Figures marked with an asterisk (*) have a coefficient of variation of approximately 10 percent or more. Value of all farm products represents value of those sold, traded, or used by farm households.]

¹ Differences between these totals and totals for farms regardless of additional land owned do not represent data for operating owners who owned additional land. Some operators did not make a report as to this item. For 1930, operators who did not report as to this item are included with those operators who reported that they owned no additional land.

No. 679.—MORTGAGED FARMS OPERATED BY FULL OWNERS, 1930 AND 1940, AND BY PART OWNERS, 1940, BY COLOR OF OPERATOR, BY AMOUNT OF MORTGAGE DEBT

NOTE.—Data are for mortgaged farms reporting amount of debt.

¹ The number of owned farms mortgaged includes farms operated by full owners and part owners. For mortgage debt, the debt on the rented portion of part-owner farms is included with tenants.

² District of Columbia figures included with Maryland.

No. 685.—TAXES ON FARMS OF OWNER-OPERATORS REPORTING REAL-ESTATE TAXES: 1930 AND 1940

NOTE.—Number, acreage, and value relate to Apr. 1 of the Census year. Taxes reported in the Census of 1930 are those paid or payable in 1929, and taxes reported in the Census of 1940 are those levied in 1939.

TENURE AND CENSUS YEAR (Farms reporting real-estate taxes)	Number of farms	Land in farms (thou- sands of acres)	VALUE OF LAND AND BUILDINGS	REAL- ESTATE TAXES	PERSONAL PROPERTY TAXES ON FARMS REPORTING REAL- ESTATE TAXES	
			Thousands of dollars		Farms re- porting	Amount (thou- sands of dollars)
REGARDLESS OF ADDITIONAL LAND OWNED						
Full owners.....1930 ¹	2,565,157	328,909	18,841,822	238,940	(²)	42,483
1940.....	2,716,837	332,371	13,990,269	173,123	1,572,700	20,496
Part owners ³1940.....	561,114	134,318	3,362,970	48,289	427,184	9,620
NO ADDITIONAL LAND OWNED ⁴						
Full owners.....1930 ¹	2,019,146	245,113	14,465,377	181,864	(²)	31,002
1940.....	1,948,058	224,105	9,561,907	116,763	1,121,068	13,741
Part owners ³1940.....	437,029	98,711	2,492,576	34,012	333,431	7,094

¹ All tax data for 1930 are for farms reporting both total taxes and real-estate taxes.

² Not available.

³ Relates only to property owned by the operator.

⁴ Differences between these totals and totals for farms regardless of additional land owned do not represent data for operating owners who owned additional land. Some operators did not make a report as to this item. For 1930, operators who did not report as to this item are included with those operators who reported that they owned no additional land.

¹ Exclusive of housework. Inquiry for 1939 specifically excluded contract construction work. No mention was made of wages for this kind of work for 1929.

² Not available.

³ Inquiry specified expenditures for automobiles, tractors, and motortrucks for 1929 and 1939, and trailers for 1939.

⁴ Includes quantities for which the farm operator reported no expenditure or expenditure for freight only.

⁵ Includes expenditures for lumber, roofing materials, hardware, cement, paint, fencing materials, etc.

FERTILIZER CONSUMPTION

643

No. 695.—FERTILIZER CONSUMPTION, 1880 TO 1943, AND BY STATES, 1941, 1942, AND 1943

[Figures are based on tag sales, records of Government officials, or estimates. Beginning 1935, figures include tonnage distributed by Agricultural Adjustment Administration and by Tennessee Valley Authority, data for the latter representing fiscal years ended June 30. Data for phosphate rock used in Illinois have been excluded. Such data have only been available since 1939 and consequently have been excluded from annual comparisons. In addition to tonnage for consumption, shown in the table below, fertilizers and fertilizer materials produced in continental United States and exported to island possessions are as follows: To Hawaii, 1937, 57,200 tons; 1938, 25,250 tons; 1939, 49,500 tons; 1940, 53,450 tons. To Puerto Rico, 1937, 128,900 tons; 1938, 90,250 tons; 1939, 100,200 tons; 1940, 153,500 tons. Data for exports in 1941, 1942, and 1943 are not available for publication]

[In tons of 2,000 pounds]

¹ Comprises independent local associations, federations, large-scale centralized associations, sales agencies, independent service-rendering associations, and subsidiaries whose businesses are distinct from those of the parent organizations.

² Comprises members, contract members, and shareholders, but excludes patrons not in these categories.

³ Represents value of commodities for which associations render essential services in marketing or purchasing and value of commodities sold by associations on a commission or a brokerage basis.

¹ For items comprising gross income, see table 700.

² Farm mortgage interest, cash wages and perquisites to hired labor, net rent to nonfarm landlords, cost of other goods and services annually used in production, and estimates of depreciation or maintenance of durable implements, equipment, and buildings (including service buildings and dwellings).

³ Cash wages and value of food, fuel, and lodging furnished are included. Any wages or other income the farm laborer may receive from nonfarm sources are excluded.

No. 707.—FARM PRODUCTION—INDEXES OF VOLUME, BY MAJOR GROUPS OF PRODUCTS: 1925 TO 1944

NOTE.—1935-39=100. Indexes are based on estimates of production for sale and for consumption in the farm home. Products fed to livestock or used for seed are not included. Calendar-year production of livestock and livestock products is compared with crop production of the same year. Commodities included in the index contributed about 93 percent of the gross farm income during 1935-39.

25. Farm Animals and Animal Products

GENERAL NOTE

The data in this section are, for the most part, from the Bureau of the Census, Department of Commerce, and from various bureaus in the United States Department of Agriculture. In general, statistics for agriculture census years are from the Bureau of the Census. Estimates for intervening years, and adjustments, where necessary, to a January 1 basis are from the Bureau of Agricultural Economics, United States Department of Agriculture. (See general note to sec. 23.)

For each decade from 1840 through 1900, the Census of Agriculture was taken as of June 1. The four decennial censuses since then have been taken as of April 15, 1910; January 1, 1920; April 1, 1930; and April 1, 1940. The 1925 and 1935 quinquennial Censuses of Agriculture were taken as of January 1. From January to April, there may be material changes in livestock inventories due to births, deaths, farm slaughter, purchases, and sales. For most of the country, April 1 is well into the season of the greatest number of livestock births, therefore, recently born animals were excluded from the 1940 enumeration. The inquiries were so worded as to include in the enumeration of April 1, 1940, only horse and mule colts and calves over 3 months old; pigs and kids over 4 months old; lambs over 6 months old; and poultry over 4 months old.

For some species of domestic livestock, there are comparatively short, cyclic fluctuations in numbers, even though the trend over a long period of time may be definitely in one direction. A single census may be taken at a time when such a cycle is at the peak or at the trough of numbers and hence gives no true indication of the long-time trend.

Annual inventory numbers of livestock on farms prepared by the Department of Agriculture together with estimates of livestock, dairy and poultry production are based on information furnished by individual farmers, supplemented by State assessors' data in a number of States, and by such records as brand inspections, rail and truck shipments, and inspected slaughter. The level for these inventories is based in large part on census enumerations for years when census data are available.

No. 716.—DOMESTIC ANIMALS ON FARMS—NUMBER AND VALUE: 1880 TO 1944

NOTE.—For census years prior to 1910 and for Jan. 1 estimates by the Dept. of Agriculture, animals of all ages are included except in figures for cattle and sheep, 1880 and 1890, which are nominally exclusive of calves and lambs, respectively. The difference in date of enumeration affects the comparability of the census figures for all classes and especially for swine.

¹ Includes only value of animals specified in preceding columns.

² Census figures for 1910 are for animals over 3½ months old; 1920, 1925, and 1935, animals of all ages; 1930 and 1940, animals over 3 months old.

³ Census returns prior to 1900 represent "milch" cows; 1900, cows 2 years old and over kept for milk; 1910, dairy cows 2 years old and over on Jan. 1, as estimated; 1920 and 1925, dairy cows and heifers 2 years old and over; 1930 and 1940, cows and heifers 2 years old and over on Jan. 1 of census year, kept mainly for milk production.

⁴ Census figures for 1910 are for sheep and lambs over 3½ months old; 1920, 1925, and 1935, sheep and lambs of all ages; 1930 and 1940, sheep and lambs over 6 months old. Jan. 1 estimates are for stock sheep.

⁵ Census figures for 1910 are for hogs and pigs over 3½ months old; 1920, 1925, and 1935, hogs and pigs of all ages; 1930, hogs and pigs over 3 months old; 1940, hogs and pigs over 4 months old.

⁶ Not available.

No. 717.—DOMESTIC ANIMALS AND CHICKENS ON FARMS—NUMBER AND VALUE, BY KIND, AND FARMS REPORTING: 1930, 1935, AND 1940

NOTE.—Data for 1930 and 1940 are as of Apr. 1, and for 1935 as of Jan. 1. Owing to the difference in the date of enumeration, the figures for 1935 are not closely comparable with those for other years. The total value of all livestock for which data were collected at each census is shown in table 653, p. 597. Available data for certain classes not shown in the table below are as follows: Turkeys over 3 months old, 1935, 5,382,000, valued at \$11,668,000; turkeys over 4 months old, 1940, 4,362,000, valued at \$7,462,000. Hives of bees (on farms and elsewhere), 1930, 3,108,000, valued at \$13,632,000; 1940, 2,277,000, valued at \$7,326,000.

¹ Farms reporting for 1930 and 1935 are for animals of all ages and for 1940, animals over 3 months old; number for 1930 and 1940 is for animals over 3 months old, and for 1935, animals of all ages.
² Figures for 1930 and 1940 are for cows and heifers over 27 months old; for 1935, cows and heifers 2 years old and over.
³ Farms reporting for 1930 and 1935 are for sheep and lambs of all ages and for 1940, sheep and lambs over 6 months old; number for 1930 and 1940 is for sheep and lambs over 6 months old and for 1935, sheep and lambs of all ages.
⁴ Farms reporting for 1930 and 1935 are for hogs and pigs of all ages and for 1940, hogs and pigs over 4 months old; number for 1930 is for hogs and pigs over 3 months old, for 1935, hogs and pigs of all ages, and for 1940, hogs and pigs over 4 months old.
⁵ Figures for 1930 and 1935 are for chickens over 3 months old; for 1940, chickens over 4 months old.
⁶ Not available.
⁷ A minus sign (—) denotes a decrease.

No. 781.—MEATS AND LARD—PRODUCTION, FOREIGN TRADE, AND CONSUMPTION,
BY KIND: 1936 TO 1943

NOTE.—All amounts, except per capita, in millions of pounds. Pork production represents total carcass weight, less raw fat from carcass which was rendered into lard. Other meat production represents dressed carcass weight only, with edible byproducts excluded. Lard production represents rendered weight of lard. Uninspected production includes farm, retail, and nonfederally inspected wholesale slaughter. Exports and imports of meats comprise the several kinds of meat converted to a dressed carcass-weight basis. Lard exports represent rendered lard, including neutral lard. Exports include shipments to Alaska, Hawaii, Puerto Rico, and Virgin Islands. Consumption represents production plus imports less exports, with allowance for changes in storage stocks. Figures for recent years are subject to revision.

YEAR	PRODUCTION			Exports of U. S. production	Imports for con- sumption	CONSUMPTION	
	Total	Federally inspected	Unin- spected (esti- mated)			Total	Per capita (pounds)

¹ For 1929, comprises whole milk and cream sold, butter churned, wool, mohair, chicken eggs, and honey produced, and chickens, turkeys, geese, and ducks raised. For 1939, includes, in addition, guineas, pigeons, quail, pheasants, and unspecified poultry raised, and pelts taken from silver fox and mink.

² Not available.

³ For 1929, represents butterfat; for 1939, butterfat content.

⁴ Not including 15,846,000 gallons of cream sold, valued at \$26,139,000, reported "not as butterfat."

⁵ Taken from fur animals in captivity.

No. 743.—WOOL—PRODUCTION, IMPORTS, AND EXPORTS: 1839 TO 1943

NOTE.—All figures in thousands of pounds. Production, except census data, is estimated and is for calendar years; figures for 1909 and later years have been revised because of revised estimates for number of sheep, based on 1935 census data. Pulled wool is included beginning 1900 and was probably included for 1870 to 1899, though the exact basis of the estimates for these years is not known. Figures for 1839, 1849, and 1859 include only fleeces. Exports and imports for 1839 are for the fiscal year ended Sept. 30; for 1899 and 1899, fiscal years ended June 30; subsequently, calendar years. Imports and foreign exports prior to 1914 and domestic exports for all years include hair of the Angora goat, alpaca, and other like animals.

YEARLY AVERAGE OR YEAR	Production	Imports	EXPORTS		YEAR	Production	Imports	EXPORTS

¹ "Scoured" wool plus "greasy" wool reduced to a scoured basis, assuming average yields varying with class, origin, grade, and whether shorn or pulled.

² Shorn wool reported "greasy" plus pulled wool reported "greasy" raised to a greasy shorn basis, and shorn and pulled wool reported "scoured" raised to a greasy shorn basis, conversion factors varying with class, origin, grade, and whether shorn or pulled.

³ Wool regarded as more or less suitable for apparel purposes; formerly "Combing and clothing."

All other products					4,974	18,144	17.533

¹ Includes, in addition to production in the dairy products industries, data for similar products made in establishments classified in other industries.

² Not including data for cheese blended or processed, amounting to 244,315,000 pounds for 1937 and 264,294,000 pounds for 1939, valued at \$45,727,000 and \$48,714,000, respectively. See census report on "Special dairy products." ³ Includes data for a small amount of Neufchâtel cheese. ⁴ No data.

⁵ Made for sale as such, unfrozen. ⁶ Production in the meat-packing industry only.

⁷ Production in the meat packing industry only. Total production in all industries, as shown in census report on "Sausages, prepared meats, and other meat products—not made in meat-packing establishments," is as follows. Cooked hams—1937, 213,136,000 pounds valued at \$69,483,000; 1939, 220,598,000 pounds valued at \$63,297,000. Canned meats—1937, 240,767,000 pounds valued at \$48,183,000, and canned meats valued at \$3,913,000 (for which no quantity was reported) made in the "Food preparations not elsewhere classified" industry; 1939, 341,425,000 pounds valued at \$65,770,000. Canned sausage—1937, 28,073,000 pounds valued at \$5,999,000; 1939, 28,897,000 pounds valued at \$5,664,000. Sausages and sausage products, other than canned—1937, 1,592,493,000 pounds valued at \$285,133,000; 1939, 1,673,570,000 pounds valued at \$273,806,000.

⁸ Total production, as shown in Census report on "Sausage casings—not made in meat-packing establishments," is valued as follows: 1937, \$27,215,000; 1939, \$24,758,000.

⁹ Wool detached from sheep pelts in meat-packing establishments.

¹ Relative production as indicated by multiplying the production of the crops of each year by the 1927-32 average prices and dividing the aggregate for each year by the average aggregate for the same crops during the 1923-32 (predrought) period.

² Corn, oats, barley, sorghums for grain, wheat, rye, buckwheat, rice, flaxseed, cotton, tame and wild hay, sorghums for forage and silage, dry edible beans, soybeans for beans, peanuts, potatoes, sweetpotatoes, tobacco, sorgo sirup, sugarcane, sugar beets, and cowpeas.

³ Asparagus, snap beans, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

⁴ Asparagus, snap beans, cabbage, cantaloupes (including honeydews, honeyballs, and miscellaneous melons), carrots, cauliflower, celery, cucumbers, lettuce, onions, peas, spinach, tomatoes, watermelons, beets, eggplant, and peppers. Production of farm gardens, home gardens, and most of market gardens excluded.

⁵ Apples, peaches, pears, grapes, plums, prunes, oranges, grapefruit, lemons, apricots, strawberries, cranberries, and olives.

No. 749.—ACREAGE LOSSES—ESTIMATED ACREAGES OF CERTAIN CROPS PLANTED AND NOT HARVESTED: 1929 TO 1944

[Acreage in thousands. Acreages for winter wheat represent areas sown the preceding fall and not harvested, thus including considerable land subsequently planted to other crops. Acreages for cotton include more than 10 million acres plowed under in 1933. Acreages of grains cut for hay are excluded. Totals do not show total crop losses chiefly because of large acreage of tame and wild hay land which produced only pasturage in some dry seasons.]

^a Acreage includes land in fruit orchards, vineyards, and planted nut trees (8,084,176 acres in 1929, 6,220,579 acres in 1934, and 5,044,993 acres in 1939) which was not reported in 1919; horticultural specialties (55,180 acres in 1919 and 157,464 acres in 1939); specified annual legumes (8,037,380 acres in 1939) grown alone. (Acreage shown for individual legumes is only that from which nuts, beans, or peas were harvested in 1939.) Values include horticultural specialties (\$106,145,000 for 1919, \$146,702,000 for 1939, and \$129,575,000 for 1939). Excludes acreage of annual legumes saved for hay (3,067,710 acres in 1929, 9,830,948 acres in 1934, and 7,157,327 acres in 1939). ^b "Kafir and milo" prior to 1929; sorghum seed included 1919. ^c Acreage grown alone. Not all harvested for grain or seed as acreage also includes that for hay and that which was grazed. Some grain or seed harvested from sorghum grown with other crops. ^d Does not include sorghum for silage. ^e Exclusive of those grown in farm gardens. ^f Values represent farm gardens and vegetables harvested for sale, except for 1924; for that year, value represents farm gardens only. The acreage for all years represents vegetables harvested for sale only. ^g Prior to 1929, nominally sugarcane either for sugar or sirup or both. Acreage includes sugarcane for seed and other purposes not specified where specific reports were available. ^h For all purposes. ⁱ Production for sugar or sale to mills was 2,992,000 tons in 1929 and 5,308,000 tons in 1939; production of sirup was 15,169,000 gallons in 1929 and 16,308,000 gallons in 1939. ^j Not comparable with earlier years. ^k Including tangerines in 1919 and tangerines, mandarins, etc., in 1929 and 1939. ^l Less than \$500.

¹ Figures for 1800 to 1895 represent commercial movement as given by Deu Talnage's Sons Co.² Figures for the years 1810 to 1863 include linters excluded in subsequent years.³ Louisiana at 1 Texas 1906 to 1923, Louisiana only 1924 to '27, Louisiana and Florida, beginning 1928.⁴ Beginning 1899, gin ngs as reported by Bureau of the Census. Figures for some years include small amounts of Baja California, Mexico, cotton ginned in United States. Round bales counted as half bale.⁵ Gross weight. Figures prior to 1899 compiled by Bureau of the Census from data published by Department of Agriculture. See also note 10, table 752, p. 687.⁶ Exports.⁷ Census figures for the previous year.⁸ Figures shown for 1870, 1875, and 1880 represent the estimated average production for 1863-71, 1874-77 and 1880-82, respectively.⁹ Ginnings.¹⁰ Not yet available.

No. 752.—PRINCIPAL CROPS—ACREAGE, PRODUCTION, AND VALUE: 1886 TO 1944

NOTE.—Tons are of 2,000 pounds. For weights of the units of measurement for principal products, see Appendix, p. 954. The approximate weights of units of measurement for other products are as follows: Number of pounds to a bushel—sweetpotatoes, 55; sorghums for grain, 56; clover seed, 60. Number of pounds to a barrel of cranberries, 100. Prices and yields for the periods are weighted averages except for cotton and cottonseed, which are simple averages of prices and yields for the individual years. Acreage, production, and yield of all crops have been revised to census data.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

² Received by farmers. Beginning 1904, prices are season average prices for the crop-marketing season, prior thereto, Dec. 1 prices. Prices for 1937 through 1944 for corn, 1938 through 1944 for wheat, and 1940 through 1944 for rye, include an allowance for unredeemed loans at average loan value.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.² Received by farmers. Prices are season average prices as follows: Barley, buckwheat, and flax beginning 1908, rice, beginning 1909. Prices for prior years are as of Dec. 1. Prices for 1940 through 1944 for barley include an allowance for unredeemed loans at average loan value.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.

⁴ Received by farmers. Beginning with 1906 for potatoes and cotton, 1910 for sweetpotatoes, and 1909 for cottonseed, prices are season average prices. Figures for prior years are Dec. 1 prices. For 1933, 1934, 1937, 1938, and 1940 season average prices for cotton crops include an allowance for unredeemed loans at average loan value.

¹⁰ Average for 8 years.

¹¹ Average for 5 years.

¹² Average for 7 years.

¹³ Average for 4 years.

¹⁴ Includes 7,462,000 bushels in 1929, 66,000 bushels in 1931, and 2,175,000 bushels in 1932 not harvested on account of market conditions. Price and value apply only to the harvested portion of the crop.

¹⁵ State production figures, which conform with census annual ginning enumeration, with allowance for cross State ginnings, rounded to thousands and added for United States totals. Cotton grown in Baja California, ginned in California from 1913 to 1924, has been excluded.

¹⁶ Production is in running bales prior to 1899; 500-pound gross weight bales thereafter.

¹⁷ Data for 1909 and 1910.

¹⁸ Area in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

¹⁹ Includes an allowance for unredeemed loans at season average price; 1944 price is season average to Dec. 1.

¹ Values are based on season average or Dec. 1 prices. See notes on "Price" column.¹² Received by farmers. See also notes on prices for each crop.¹⁴ Based on the reported price of grain sorghums.¹⁷ Equivalent solid acreage.¹⁸ Prices are season average prices, prices of beans being for cleaned beans.¹⁹ Average for 1929 and 1930.²⁰ Bags of 100 pounds (uncleaned).²¹ Farm value of dry edible beans equals the price of cleaned beans applied to the production of clean beans rather than to the total production.²² Average for 1924 and 1925.²³ Average for 1919 and 1920.²⁴ Dec. 1 prices, 1916 to 1931; beginning 1932, season average prices.²⁵ Includes 5,436,000 pounds in 1935, 4,365,000 pounds in 1937, 3,140,000 pounds in 1938, and 2,814 pounds in 1939, not available for marketing because of economic conditions and the marketing agreement allotments. Prices and values are computed on the harvested crop.

1. Prices are based on season average or Dec. 1 prices. See notes on "Price" column.
 2. Received by farmers. Prices are as of Dec. 1 except as noted.
 3. Prices are season average prices beginning 1919; Dec. 1 prices theretofore.
 4. c. 1 price. Prior to 1942, price of sweet sorghums for forage and hay.
 5. Average for 1929 and 1930.
 6. For 1939, data are for 7 States. Production figures include fruit consumed on farms, sold locally, or for manufacturing, as well as that shipped; they exclude fruit which ripened on the trees but destroyed prior to picking. Figures relate to the crop produced from the bloom of the year shown. In California the picking season usually extends from about Oct. 1 to Dec. 31 of the following year. In other States, the season begins about Oct. 1.
 7. Prices are season average.
 8. Content of boxes varies. In California and Arizona, the approximate average is 77 lbs.; in other States, 90 lbs.
 9. Season average returns to growers. Price and value apply to entire crop exclusive of that portion donated to charity, unharvested, and/or eliminated on account of market conditions. (See note 34.) Prices are equivalent packing-house-door returns for all methods of sale and are weighted by production in U. S. averages.
 10. Production includes the following quantities donated to charity, unharvested, and/or eliminated on account of market conditions (1,000 boxes): 1933, 977; 1934, 1,396; 1935, 614; 1936, 1,023; 1937, 1,204; 1938, 1,236; 1940, 1,322; 1941, 762; 1942, 654; 1943, 830. Price and value are computed on the remaining crop.
 11. U. S. Dept. of Agriculture, Bureau of Agricultural Economics; annual report, Agricultural Statistics and summaries of crop statistics.

ry,
season average prices include an allowance for unredeemed loans at average loan value.
is average.

partment of Agriculture, Bureau of Agricultural Economics; annual summaries, Acreage,
roduction of Principal Crops and Season Average Prices and Value of Production.

No. 762.—COTTON AND COTTONSEED—ACREAGE, PRODUCTION, AND VALUE: STATES: 1911 TO 1944

[Cotton production excludes linters. Figures for production in some States differ slightly from those figures on ginnings due to ginnings in 1 State of cotton grown in another. Where figures are not for the individual States, separate data are not available for the entire period but are included in United States totals. Values shown are for the marketing season or crop year and should not be confused with calendar year income. Yields and prices for the periods are simple averages of figures for individual years. Tons are of 2,000 pounds]

YEARLY AVERAGE OR YEAR	COTTON					COTTONSEED			Tons per acre
	Acres	Bales (500 pounds gross)	Farm value	Yield per acre	Farm price per pound ¹	Quantity	Farm value	Farm price per ton ¹

No. 765.—TRUCK CROPS, COMMERCIAL—ACREAGE, PRODUCTION, AND VALUE, BY KIND, 1933 TO 1944, AND FOR LEADING STATES, 1944

[Only States with a crop of commercial importance are included. Approximate weights of the units of measurements are as follows: Number of pounds to the crate—aspargus, 24; cantaloupes, 60; cauliflower, 87; celery, 63 (¼ size crates); honeyball melons, 60; honeydew melons, 35; strawberries, 35 (24-quart crates). Number of pounds to the bushel—carrots, 50; cucumbers, 45; eggplant, 23; kale, 18; peppers, 25; potatoes, 60. Number of pounds to a box of artichokes, 40. Lettuce is in western crates (mostly 4 to 6 dozen heads), 70 pounds, onions, 50-pound sacks; and garlic, 100-pound sacks. Tons are of 2,000 pounds. Values are based on average seasonal farm prices.]

¹ Market and processing production estimated in different units which can not properly be combined. (Processing on shelled basis).

² Includes some quantities not marketed and excluded in computing value.

³ Mainly for canning, but includes also market crop in New Jersey, New York, and Pennsylvania.

⁴ Includes peppermint and spearmint. ⁵ Pounds of oil. ⁶ Commercial early Irish. ⁷ Short-time average.

1934, estimates refer to production of apples in commercial apple areas of each State and produced for sale to commercial processors, as well as that for sale for fresh consumption.

2 1900 and 1910.

Some quantities not harvested on account of market conditions or scarcity of harvest labor.

2 apples is for 1934 and 1935.

1944 ⁵	295.0	20.8	6,148	5.04	31,008	476	444	167	32,940	43,940

¹ Growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

² Calculated by the Agricultural Adjustment Administration method. (E. R. Series I, No. 1.)

³ Based on the ratio of 100 pounds of raw sugar to 93.46 pounds of refined sugar.

⁴ Not including sirup production. See table 774. ⁵ Preliminary.

Source: Dept. of Agriculture, Bureau of Agricultural Economics; annual report, Agricultural Statistics. Also published in The World Sugar Situation and in part, currently, in Crops and Markets.

No. 776.—SUGARCANE AND CANE SUGAR—PRODUCTION OF HAWAII: 1930 TO 1943

NOTE.—Tons are of 2,000 pounds.

YEAR	Total acres in cane	CANE USED FOR SUGAR			SUGAR MADE (1,000 TONS)		sugar 96° made per ton of cane (pounds)	Recov- ery of equiva- lent re- fined sugar from cane ground ¹ (percent)

¹ For factor used in converting raw sugar to refined, see note 8, table 780.² Ton of 2,000 pounds.³ Actual quantity of sugarcane harvested, including 6,392,647 tons of sugarcane cut for the production of sugar, and 1,125,914 for the production of high-grade molasses. It is estimated that about 1,955,432 tons of sugarcane were left standing and harvested the following year.

¹ Includes Puerto Rico, Hawaii, Phil. Is., and beginning 1910, Virgin Islands not shown separately.

² Beet sugar not converted to raw prior to 1909. Refined reduced to raw basis by multiplying by 1.07.

³ For 1900 to 1906, shipments to the United States.

⁴ Statistics for 1874 to 1880 represent exports. Normal grinding season begins Oct. 1. In 1933, production was from grindings of Oct. 1, 1933, to Dec. 31, 1934; beginning 1934, from grindings of the next calendar year.

⁵ Exports 1871 to 1911, production 1912 and subsequently. Includes production of muscovado and pe-
nocha, low grades of sugar mostly for domestic consumption.

⁶ Less than 500 tons.

⁷ One year only.

⁸ Not available.

⁹ Louisiana and Texas 1909 to 1929; Louisiana only 1924 to 1927; Louisiana and Florida beginning 1928.

Source: Dept. of Agriculture, Bur. of Agricultural Economics. Compiled from official sources and International Institute of Agriculture. Published in annual report, Agricultural Statistics, and also in The World Sugar Situation.

¹ Beginning 1910, stocks on hand are taken into account. Figures for 1910-20 are for cane sugar only. 1922-34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to the sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet sugar factories, as reported by the Sugar Division, U. S. Department of Agriculture.

² Beet sugar converted to raw at the rate of 1.075 through 1920.

³ Includes Hawaii, Puerto Rico, and the Philippine Islands; Virgin Islands included beginning July 1, 1917.

⁴ No account taken of sugar imported in other forms. Imports from the Philippine Islands included beginning July 1, 1900, and from Virgin Islands beginning July 1, 1917; reexports deducted through 1932.

⁵ Includes shipments to Hawaii and Puerto Rico for all years, to Alaska beginning 1933, and the Virgin Islands beginning Jan. 1, 1935. Excludes direct exports to foreign countries through customs districts noncontiguous territories.

⁶ Sugar used in the manufacture of other commodities for export on which drawback was paid, taken as account beginning 1910.

⁷ Not available for publication.

⁸ Raw sugar converted to refined by multiplying by the following factors. For years prior to 1922, 0.938; 1922-30, Cuba and Hawaii, 0.9358; Puerto Rico, 0.9393; Philippine Islands, 0.95; all others, 0.932; beginning 1931, Hawaii, 0.9617; Puerto Rico, Philippine Islands, and Virgin Islands, 0.946; Cuba and all others, 0.941.

¹ Exports assumed to be wholly from sugar imported from foreign countries.

² Hawaii, Puerto Rico, and Philippine Islands and beginning July 1, 1917, Virgin Islands.

³ Not available.

⁴ Later data not available for publication.

Source: 1875 to 1909, computed from production as reported by the Department of Agriculture, and exports, imports, and shipments as reported by the Department of Commerce, Bureau of Foreign and Domestic Commerce; thereafter, based on data in tables 779 and 780.

No. 782.—COTTON—PRODUCTION, CONSUMPTION, EXPORTS, IMPORTS, PRICES, AND CARRY-OVER: 1905 TO 1944

NOTE.—All figures, except average net weight and price, in thousands of bales. Production figures relate to crop of preceding year and are compiled from individual reports of ginner. Beginning 1911, price per pound represents average price received by growers, as computed by Department of Agriculture; for earlier years, it is average price of average grade marketed in New Orleans prior to April 1 of following year. Consumption figures relate to 12 months during which crop of specified year was chiefly marketed, and not to calendar year. Export and import figures (compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter) relate to 12 months beginning Sept. 1 for years prior to 1915, and to 12 months beginning Aug. 1, thereafter. Figures for linters are included in those for consumption prior to 1909, and in export figures prior to 1915. Separate figures for linters prior to those years not available. See 1937 Statistical Abstract, table 659, for figures for years prior to 1905.

YEAR ENDED JULY 31 ¹	COTTON (EXCLUSIVE OF LINTERS)

No. 783.—COTTONSEED AND COTTONSEED PRODUCTS—PRODUCTION, VALUE, AND EXPORTS, 1881 TO 1944, AND BY STATES, 1944
 NOTE.—Cottonseed production relates to the preceding crop year; other data relate to 12 months ended July 31, except exports, which are for 12 months ended June 30 of year indicated in stub. Tons are 2,000 pounds. Export data compiled by Bureau of Foreign and Domestic Commerce through April 1941, Bureau of Census thereafter.

1. due to depreciation of Brazilian paper milreis. ² Average, July 1, 1915, to Dec. 31, 1920.t. of Commerce, Bur. of Foreign and Domestic Commerce through April 1941, Bureau of the
rester; compiled from data in annual report, Foreign Commerce and Navigation, and from
ents to and from Territories and possessions in Monthly Summary of Foreign Commerce
States.

No. 786.—TEA—NET IMPORTS: 1830 TO 1942

NOTE.—Quantity, except per capita, in thousands of pounds; value in thousands of dollars; per capita in pounds. Years ended June 30 through 1918; thereafter, calendar years. Beginning 1919, data relate to trade of continental United States only (see headnote, table 785); prior to that time the small trade between the United States and noncontiguous territories is not included.

No. 792.—CORN, WHEAT, AND OATS—COMMERCIAL STOCKS, BY MONTH: 1934-35 TO 1943-44

NOTE.—All figures in thousands of bushels. Number of pounds to a bushel: Wheat, 60; corn, 56; oats, 48. Figures represent domestic grain in store in public and private elevators at terminal markets and at vessels or barges in harbors of lake and seaboard ports; they do not include grain in transit, stocks in silos or elevators attached to mills, or private stocks intended for local use. Stocks are as reported on first day nearest the first of each month. Official statistics were not compiled prior to January 1927. Real street's visible supply is given for earlier years in the 1935 and previous issues of the Statistical Abstract.

27. Forest and Forest Products

GENERAL NOTE

The Bureau of the Census, Department of Commerce, and the Forest Service, Department of Agriculture, are the principal Government agencies engaged in the collection and publication of statistics of forest land, forest industries, and forest products. The Forest Service, through its forest survey activities, is making an inventory of the forest resources and is measuring rates of forest growth and drain. A number of reports for surveyed areas have been published. Other publications of the Forest Service include data on stumpage and log prices, lumber consumption and distribution, lumber used in manufacture, and fire statistics. The Statistical Supplement to the Annual Report of the Chief of the Forest Service carries statistics of the administration of the national forests.

The Bureau of the Census, Department of Commerce, publishes information on forest industries and products in reports of the Census of Manufacturers, in addition to annual reports of the Census of Forest Products. The Bureau of the Census also publishes statistics of foreign trade in forest products. Information on the domestic movement of forest products is reported by the Interstate Commerce Commission and the Association of American Railways.

The Bureau of Agricultural and Industrial Chemistry of the Department of Agriculture publishes annual reports of the production of naval stores.

The Bureau of Labor Statistics of the Department of Labor publishes statistics of wholesale lumber prices monthly and annually.

The Timber Products and Pulp and Paper series of the Industry Reports, published by the Bureau of Foreign and Domestic Commerce in cooperation with other government agencies, carry forest products statistics which have been developed to meet current needs for information.

A number of forest products trade associations and trade journals collect and publish statistics of forest products, production, markets, shipments, inventories, etc.

The completeness and reliability of published statistics of forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those areas which have not been covered. Forest fire statistics for federal lands are considered much better than for private lands, though too much reliance should not be placed in any estimates of fire damage or causes of fires.

In the field of forest products, data for lumber production and other manufactured products such as veneer and plywood, pulp and paper, cooperage, naval stores, etc., are much more complete than for the primary forest products such as poles and pilings, fuelwood, and fence posts. As explained in the headnote to the following table, however, the data for lumber production are subject to certain limitations because of incomplete coverage. Information for pulp and paper, and plywood, on the other hand, are believed to be practically complete. Statistics relating to average value of lumber sawed may be subject to some special limitations due to under representation of small mills.

¹ In continental United States; includes National Forests, Interior, Soil Conservation Service, TVA, Public Domain, etc.

² In continental United States and Hawaii. Data reported to Forest Service by its field offices, cooperating agencies, other Government bureaus, and similar sources. Statistics on unprotected areas based on State estimates only.

³ Prior to 1939 forest area included total area needing protection. Beginning with 1939, this area included only forest area needing protection, which accounts for reduction in areas between 1938 and 1939.

⁴ Included in State and private forests, protected area.

¹ Includes both saw timber and cordwood trees. The cubic volumes include the tops and limbs, not the bark.

² Includes only timber of saw timber size. Lumber items include allowances for logging waste which might have been utilized.

³ Lumber tally measure.

⁴ A square is considered equivalent to 800 pieces.

⁵ 1936 figures. No later data available.

Source: Department of Agriculture, Forest Service; records (not published elsewhere). Based in part upon forest products statistics of the Department of Commerce, Bureau of the Census.

No. 808.—LUMBER—PRODUCTION, BY KIND OF WOOD, AND AVERAGE MILL VALUE

[Data are not strictly comparable because of varying coverage from year to year. Results are based on mill returns supplemented by field enumeration for decennial census years and 1942; for other years (not including 1943) on mill returns only, except as indicated in headnote table 780. Data for 1943 are derived from the complete enumeration in certain Western States and of larger mills in the Eastern States, supplemented by estimates of the operations of smaller mills in the Eastern States based on a sample of mills. For a more detailed discussion, see Census of Forest Products, 1943]

[Quantities in millions of board feet; average mill value per 1,000 board feet]

¹ Data are not available. ² Includes 298,000,000 board feet of lumber not reported by kind of wood.

³ Excludes 165,305,000 board feet of softwood lumber and 7,605,000 board feet of hardwood lumber sawed by New England mills from timber salvaged from the hurricane of 1938.

⁴ Less than 500,000 board feet were reported. ⁵ Included in "Other hardwood." ⁶ Includes magnolia.

No. 812.—LATH AND SHINGLES—PRODUCTION, 1899 TO 1943, AND BY STATES, 1940 TO 1943

[Lath in thousands and shingles in squares. Shingles were reported in thousands prior to 1933 and were converted to squares on the basis of 800 shingles to the square. See headnote, table 8C8 for explanation of lack of comparableness of statistics, because of incomplete coverage. The effect on total production statistics for lath is not known. Data for shingles are reasonably comparable over a period of years, because of complete enumeration of Red Cedar Shingle Industry, this industry's production comprising over 90 percent of total shingle production.]

1 Beginning 1914 includes screenings.

2 Includes data for existing mills not classified as producers of pulp before 1940. In that year data for 6 mills not previously classified as producers of wood pulp were included for first time. For the same reason, an additional mill was included in 1941, and 2 more added in 1943.

3 Includes data for 25 existing mills not previously classified as producers of paper and paperboard.

4 Includes estimated production of insulating board for 1 mill. Estimates were made on assumption the production of this mill was proportionately the same in 1941 and 1942 as in 1943.

Source: Department of Commerce, Bureau of the Census; reports of Biennial Census of Manufactures; Census of Forest Products, 1940; and annual report, Census of Pulp Mills and of Paper and Paperboard Mills, 1941 to 1944.

¹ Reported in bookpaper and paper not elsewhere classified.² 1944 figures include production of special industrial boards; figures for other years represent production of special industrial paper, only.³ Less than 500 tons.⁴ Includes estimated production of insulating board for 1 mill. Estimates were made on the assumption that production of this mill was proportionately the same in 1941 and 1942 as in 1943.⁵ Includes tube stock, classified as all other paperboard in subsequent years.

¹ Figures for turpentine and rosin from crude gum, beginning 1929-30, and from wood beginning 1933-34 relate to crop year ended Mar. 31. All other figures relate to calendar years.

² Figures compiled from data reported by establishments in Turpentine and Rosin industry.

³ Figures compiled from data reported by establishments in Wood-Distillation industry.

⁴ Not reported.

⁵ Includes, for 1909 and 1914, 18,310 gallons and 92,401 gallons, respectively, of turpentine and, for 1914, 4,495 barrels of rosin, reported by establishments engaged in manufacture of lumber and timber products.

⁶ Estimated by J. E. Lockwood; complete data not available. Figures include estimates of rosin produced from reclaimed gum, as follows: 1932-33, 33,400 barrels; 1933-34, 35,000; 1934-35, 34,000.

⁷ Includes estimates by J. E. Lockwood for production of turpentine from steam-distilled wood.

⁸ Includes data for rosin produced from reclaimed gum: For 1935-36, 54,187 barrels; 1936-37, 42,694; 1937-38, 26,271; 1938-39, 39,979; 1939-40, 39,268; 1940-41, 25,226; 1941-42, 24,706; 1942-43, 14,121; 1943-44, 12,280.

⁹ Figures do not include data for rosin produced from reclaimed gum. See note 8.

28. Fisheries

GENERAL NOTE

The Fish and Wildlife Service, Division of Commercial Fisheries in the Department of the Interior, conducts annual surveys for various statistical information on the fishery industries. These data are published in greater detail in publications of the Service and include data on the volume of the catch of individual species of fish and shellfish and their value, employment in the fisheries, quantity of gear operated, the number of fishing and transporting craft employed in the capture and transporting of fishery products, employment in wholesale and manufacturing establishments, and volume and value of the production of manufactured fishery products. In addition to the basic statistics on employment, yield, and the production of manufactured fishery products for individual States and various geographical sections, there are included in reports data on imports and exports of fishery commodities; landings by fishing vessels at Boston, Gloucester, and New Bedford, Massachusetts; Portland, Maine, and Seattle, Washington; shad fisheries of the Hudson and Potomac Rivers; alewife fishery in the Potomac; seed oyster fisheries; a review of the Pacific Coast halibut fishery; a statement on whaling operations by United States firms; data on the sponge fishery, and lists of firms producing various manufactured fishery products. These data are summarized in the Statistical Abstract. The more detailed information may be obtained from the Fish and Wildlife Service, Washington 25, D. C.

No. 821.—FISHERY PRODUCTS—QUANTITY AND VALUE, BY SECTIONS AND STATES: 1880 TO 1942

NOTE.—Values in this table and tables 822 to 824 represent the value of the fish to the fishermen.

**No. 832.—MINERAL INDUSTRIES—SUMMARY FOR THE UNITED STATES: 1919,
1929, AND 1939**

NOTE.—Statistics cover producing operations only. In general, those for 1939 cover only those operations (or concerns producing crude petroleum, natural gas, and natural gasoline, and rendering oil- and gas-field services) for which total value of all products, reported principal expenses, cost of buildings, machinery, and equipment during the year, or cost of drilling and equipping wells during the year amounted to \$2,500 or more. For bituminous coal and lignite an output criterion of 1,000 tons of coal was substituted for value of all products. Statistics for the common sand and gravel industry exclude data for operations that produced less than 15,000 tons of sand and gravel unless reported principal expenses or cost of buildings, machinery, and equipment during the year amounted to \$15,000 or more. Statistics for 1929 cover, in general, only those "enterprises" for which total value of all products or cost of development work amounted to \$2,500 or more. Bituminous coal and lignite mines that produced less than 1,000 tons of coal and common sand and gravel operations that produced less than 25,000 tons of sand and gravel, were excluded. Statistics for 1919 exclude data for "enterprises" for which value of all products was less than \$500 or cost of development work was less than \$5,000. Noncommercial production of stone and sand and gravel obtained from mines or quarries operated by governmental agencies, public utilities, or by construction companies or contractors producing wholly for their own use or on contract for governmental agencies is excluded for all years.

ITEM	1930 (all industries)	COMPARATIVE STATISTICS FOR 1930 AND 1929		COMPARATIVE STATISTICS FOR 1930 AND 1919

¹ Excludes statistics for the common clay and shale, crude petroleum and natural gas, greensand, natural gasoline, peat, potash, and rock salt industries, for comparability with 1929.

² Excludes the common clay and shale, common sand and gravel, glass-sand, foundry-sand, natural sodium compounds, peat, potash, and rock salt industries, and limestone mines and quarries operated in conjunction with cement and lime plants for comparability with 1919.

* Includes value of crude minerals produced, value added during the year by preparation processes, receipts for services performed for other concerns, and value of electric energy generated and sold.

* Represents statistics for skilled and unskilled employees who perform manual labor, use tools, operate machines, handle materials, and care for property. The average numbers of wage earners were derived by adding the numbers reported for each month and dividing the sums by 12.

* Represents statistics for salaried employees at operations and at central and branch offices, including officers of corporations, managers, superintendents, and other supervisory personnel, responsible professional and technical employees, and clerical employees. The number of salaried employees represents the number receiving pay on a representative or normal day or pay-roll period—for 1939, during the normal pay-roll period ending nearest Oct. 14; for 1929, on Dec. 14 or on the nearest representative day; for 1919, Dec. 15 or on the nearest representative day. Salaries represent the total amount paid to salaried employees during the calendar year.

Represents statistics for proprietors and firm members at operations and at central and branch offices.
Census statistics not available.

For 1939 includes installation costs, which are excluded for 1929.

Statistics for 1939 and 1929 refer to equipment in use or available for use at the end of the year.

^b Includes equipment, with rating of 8,865 horsepower, operated by purchased power other than electric power.

¹ Companies with operations in more than 1 industry are counted only once in the totals.

² See note 3, table 832. ³ See note 4, table 832. ⁴ See note 5, table 832. ⁵ See note 6, table 832.

⁶ Represents permanent additions and major alterations (including installation costs); minor additions and replacements and the cost of land are excluded.

⁷ See note 9, table 832.

⁸ Not shown because of dissimilar products.

⁹ Includes amounts received by or due contractors for services performed during the year.

¹⁰ Includes statistics for 334 salaried employees paid \$1,091,000 at central offices that served more than mineral industry.

¹¹ Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general service for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.

¹² Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$150,000. These expenditures are not included in totals shown.

¹³ Crude petroleum, 1,228,133,816 barrels (42 gallons); natural gas, 2,929,184,828 M cu. ft., of which 2,287,413,256 M cu. ft. were marketed.

¹⁴ Thousands of gallons.

¹⁵ Includes data for 58 strip-pit and culm-bank contractors.

¹⁶ Excludes, to avoid duplication, \$10,618,000 paid strip-pit and culm-bank contractors by colliery companies.

¹⁷ Tons of 2,240 pounds.

42	Contract-service operations ⁷	2,067	—	—	—	208,333	48,595	41,438	3,879
43	Oil- and gas-field services.....	1,888	—	—	—	203,844	46,939	40,061	5,153
44	General services for mineral industries.....	179	—	—	—	4,488	1,656	1,365	126
45	Nonproducing operations ⁸	453	169	89	—	—	2,175	1,458	511

¹ Companies with operations in more than 1 industry are counted only once in the totals.² See note 3, table 832.³ See note 5, table 832.⁴ See note 4, table 832.⁵ See note 6, table 832.⁶ Represents permanent additions and major alterations (including installation costs); minor additions and replacements and the cost of land are excluded.⁷ See note 9, table 832.⁸ Not shown because of dissimilar products.⁹ Contractors performing oil- and gas-field services were not asked to report expenditures for supplies and materials, fuel, purchased electric energy, or contract work, and contractors performing general services for mineral industries were not asked to report expenditures for contract work. These expenditures are not included in totals shown. Expenditures by "Contract-service operations" duplicate in part the expenditures for "Contract work" reported by producing operations.¹⁰ Oil- and gas-field contractors were not asked to report expenditures for buildings, machinery, and equipment, and contractors performing general services for mineral industries were asked to report only combined expenditures for these items, which amounted to \$150,000. These expenditures are not included in totals shown.¹¹ Tons of 2,240 pounds.¹² Less than \$501.

Contractors engaged chiefly in development work for other concerns in the mineral industries; Penn-
sylvania anthracite strip-pit and culm-bank contractors are excluded. Statistics for contractors performing
oil and gas-field services exclude data for oil- and gas-field work performed on contract by concerns that also
produced oil and gas wells for their own account unless separate reports were obtained for each of these two
types of activities. Statistics are also excluded for concerns rendering oil- and gas-field services or producing
petroleum, natural gas, or natural gasoline whose reports covering these activities indicated that
the value of products and services rendered, nor reported principal expenses, nor cost of buildings,
machinery, and equipment, nor cost of drilling and equipping was amounted to as much as \$2,500 during
the year.

Statistics for contractors performing general services for mineral industries exclude data for con-
cerns that received or were due less than \$2,500 for work done during 1939.

Statistics cover, in general, only those operations that had reported principal expenses or cost of build-
ings, machinery, and equipment during the year of at least \$2,500; for common sand and gravel the cor-
responding minimum was \$15,000. Statistics include data for oil- and gas-field operations in States in which
reporting concerns had no products, provided the concerns were large enough to come within the scope
of the census as defined in footnote of table 332.

Total nonmetallic products (approximate)						3, 779, 010	3, 513, 579	4, 745, 496	3, 519, 449	3, 508, 367

Mineral fuels.....	1, 014, 510	586, 870	4, 124, 000	2, 493, 000
	2, 764, 500	2, 330, 000	1, 037, 900	974, 000
			3, 708, 100	4, 589, 000
Grand total (approximate).....	4, 764, 800	3, 650, 000	6, 878, 000	8, 056, 000

1 From both domestic and foreign ores. Beginning 1935, data represent antimonial lead produced at primary refineries from both primary and secondary sources, and are not comparable with data for prior years; estimate of value of primary antimony and lead content of antimonial lead from domestic sources included in total value of metallic products.

2 Content of antimonial lead. Value of the antimony in antimonial lead excluded from total value.

3 Largely from foreign ore beginning 1935. Value not included in total value. Bureau of Mines not at liberty to publish value figures or quantity figures for 1940-1943.

4 Figures not available or Bureau of Mines not at liberty to publish them; value included in total value of metallic or nonmetallic products.

5 Product from domestic ores only.

6 Value does not include premiums paid miners by the Government. Total premiums for copper, lead, and zinc amounted to approximately \$26,000,000 in 1942 and \$68,000,000 in 1943.

7 According to Bureau of the Mint; valued at \$20.67+ per ounce through 1930, at \$35 per ounce in 1935 and subsequent years.

8 Value not included in total value; see headnote.

9 Value calculated at nominal price, 27 cents per pound.

10 Figures not available. Value of products derived therefrom, or of raw materials used, is included elsewhere.

11 According to Bureau of the Mint.

12 Less than \$500.

13 Figures obtained through cooperation with Bureau of the Census. For 1940, total is estimate based on figures issued by Bureau of the Census as somewhat incomplete. For 1941-43 there was no canvass; total for clay products is estimate by Bureau of Mines; no estimate was made for sand-lime brick. Beginning 1937, value of clay products exclude values of pottery and refractories.

14 Includes brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania.

15 Quantities as reported by Department of the Interior, National Bituminous Coal Division; values include selling expenses.

16 Gypsum mined. After 1936, value of crude at mine; for earlier years, value as sold (crude and calcined).

17 Figures cover fiscal year ended June 30 of year stated.

18 Includes mica recovered by grinding mica schist; excluded in prior years shown.

19 Figures not available; value of iron ore sold for paint included in total value of nonmetallic products.

20 Sublimed blue lead, sublimed white lead, leaded zinc oxide, and zinc oxide.

21 Figures not available.

22 No canvass. Estimate of value included in total value of nonmetallic products.

23 Includes soapstone used as dimension stone.

24 From copper and zinc smelters and from roasting of high-sulfide gold and silver concentrates.

25 For 1936, figures exclude soapstone. For 1936 and thereafter, figures cover talc, pyrophyllite, and ground soapstone. Dimension soapstone is included in stone-value of soapstone in 1930 is included in total value of nonmetallic products; Bureau of Mines not at liberty to publish figures.

No. 886.—MINERAL PRODUCTION, BY STATES AND FOR ALASKA: 1937 TO 1942

NOTE.—The sum of the State totals in the table below does not agree with the total for the United States given in tables 830 and 835 chiefly because of the following reasons: (1) Figures for certain of the metals included in the United States total are not available by States of origin; (2) the use of iron ore values in State totals and pig iron values in United States total; (3) the use of mine figures for gold, silver, copper, lead, and zinc in the State totals and mint and smelter figures in the United States total; and (4) inclusion of estimates in the United States total for a few products for which no census has been conducted for many years and for which no estimate by States is made.

des are sold for paint.

des 643 long tons of byproduct ore not included in figures for districts in 1942 and 653 in 1943.

ata not available for earlier years.

available for publication.

des a small quantity of ore produced in southern Wis. in 1940 and in southern Minn. in 1941.

included in Southwestern in 1940 and in Western in 1941-43.

hematite included with magnetite in 1940 and some magnetite included with hematite in all
also some brown ore included with magnetite in 1940.

ban 500.

¹ Includes much duplication.² Value of products less cost of materials, supplies, fuel, and purchased electric energy. Beginning 1931 deductions include, in addition, cost of contract work.³ No data.⁴ Includes data for 5 establishments in 1937 and 2 in 1939 engaged in production of sintered ore and fine dust and operated independently of blast furnaces.

Source: Department of Commerce, Bureau of the Census; reports of Biennial Census of Manufactures.

No. 844.—IRON AND STEEL—AGGREGATE EXPORTS: 1890 TO 1942

—This table covers products listed in table 845 and therefore does not include data for highly elaborated products of iron and steel. Value figures for 1921 and prior years exclude, and those for 1922 and subsequent years include, data for small items for which quantity figures are not available. Data for manganese are included for all years. Data for steam and hot-water heating boilers and radiators, formerly classified as heavy iron and steel products, have been excluded for 1922 and subsequent years.

(Quantities in thousands of long tons (2,240 pounds); values in thousands of dollars)

o. 848.—COPPER—PRODUCTION, EXPORTS, IMPORTS, AND CONSUMPTION: 1910 TO 1943

NOTE.—All quantities except ore produced in millions and tenths of millions of pounds. Production figures include continental United States and Alaska. Owing to the varying stages of production, the stocks in different classes of hands, the redistribution of copper previously purchased, the recovery and use of old copper, etc., calculations of consumption are somewhat uncertain. The American Bureau of Metal Statistics presents consumption estimates rather widely different from those given below. Consumption as shown represents the quantity of copper withdrawn on domestic account, but not actual domestic consumption, as no account is taken of consumers' stocks.

ITEM	1910	1920	1930	1935	1940	1941	1942	1943

New and old copper.....	921.0	1,679.0	2,199.0	1,780.0	3,081.7	4,735.9	5,211.7	5,415.4

¹ Units of 2,000 pounds. Old tailings are included beginning with 1930. ² Not available.

³ For immediate consumption plus copper entering under bond.

⁴ Ore from the Philippine Islands included under concentrates.

⁵ Not available for publication.

⁶ Imports of refined copper in ingots, bars, or other forms included in imports of unrefined.

⁷ Some copper from Michigan was electrolytically refined and is included with electrolytic.

⁸ Includes pig. ⁹ Includes 9,431 tons in chemicals in 1940, 9,804 in 1941, 17,455 in 1942, and 13,019 in 1943.

¹⁰ Includes small exports of unrefined black blister and converter copper (bars, pigs, etc.).

¹¹ Excludes refined copper in rods.

849.—COPPER—SMELTER PRODUCTION, BY STATE OF ORIGIN OF ORE: 1910 TO 1943

¹ Figures for 1919 and prior years include data for refined copper imported.

² Excludes premiums paid to miners by the Government.

Source: Department of the Interior, Bureau of Mines; Minerals Yearbook.

No. 851.—COPPER—EXPORTS AND IMPORTS: 1891 to 1942

NOTE.—Exports are those classed as "domestic" in the foreign trade statistics but include copper or refined in the United States from imported ore or unrefined metal. Values include all forms of copper except the small item, "Other manufactures." Copper content of ore for years 1891-1915 and of imports for years 1894-1903 was estimated.

No. 853.—LEAD—PRODUCTION OF REFINED PRIMARY AND SECONDARY LEAD, 1830 TO 1943, AND BY CLASS AND SOURCE, 1830 TO 1943

NOTE.—Production in short tons (2,000 pounds); values, except price per pound, in thousands of dollars. Figures, except those for antimonial and secondary lead, relate to new (primary) lead only; totals include lead derived from both domestic (including Alaska) and foreign ore. General production figures and production of desilverized lead exclude lead content of antimonial lead, shown in part to last column.

No. 555.—NONFERROUS METALS AND ALLOYS AND FINISHED PRODUCTS THEREOF—PRODUCTION, BY KIND: 1935, 1937, AND 1939

NOTE.—Table shows products made for sale and interstate transfer, excluding those made for consumption in home works. Data represent production of commodities specified, whether made as primary or secondary products by industries reporting them. The census designations of industries in which the commodities are made are as follows: "Alloying and refining and drawing of nonferrous metals, cast aluminum," "Secondary smelting and refining of nonferrous metals not elsewhere classified," "Nonferrous metal products (except aluminum)," and "Nonferrous metal products not elsewhere classified." In data are included for production of copper, lead, zinc, and other nonferrous metals from the ore and secondary metals by establishments engaged in primary smelting and refining of nonferrous metal.

No. 858.—GOLD AND SILVER—PRODUCTION IN CONTINENTAL UNITED STATES, ALASKA, PUERTO RICO, AND PHILIPPINE ISLANDS: 1792 TO 1943

NOTE.—The value of gold, in terms of money, being at a fixed rate, is not shown in the table. Gold valued at \$20.67+ per fine troy ounce from 1837 through 1933. In 1933, however, varying higher prices prevailed subsequent to the Executive order of Aug. 29. The value of gold production for 1933, as computed by the Bureau of Mines, was \$65,358,000, including \$52,843,000 calculated at legal coinage value (\$20.67+ per ounce) plus \$12,485,000 premium calculated at average weighted price (\$25.86 per ounce). On Jan. 2, 1934, the legal value of gold was fixed at \$35 per fine ounce. The value of silver given is commercial value, except for 1921 to June 1923 and beginning 1934 (see footnotes 1 and 2), which has differed materially from coinage value.

^a For 1921, 1922, and first half of 1923 price is taken at the figure of \$1 per ounce fixed by the Pittman Act.

^b Value 1934-37 calculated on basis of average amount per ounce returned to depositors of newly-mined domestic silver: 1934, \$0.64+ per fine ounce; 1935, \$0.71875; 1936, \$0.7745; 1937, \$0.7735. Value thereafter calculated on basis of amount per fine ounce returned to depositors of newly-mined domestic silver produced: In 1938, \$0.6464+; 1939, \$0.6787+; 1940-43, \$0.7111+.

^c Less than 800 ounces.

¹ As prior to 1934 calculated on basis of \$20.67+ per fine ounce; in 1934 and thereafter, \$35.00 per fine ounce.
² Excess of return from industry over new material issued to industry.

D. 860.—SILVER—PRICES, LONDON AND NEW YORK, AND VALUE IN THE DOLLAR: 1835 TO 1943

The London price is converted to the basis of the ounce 1,000 fine and converted to American dollars at par of exchange through 1930; thereafter, at the current rate of exchange. London quotations in depreciated currency after Sept. 21, 1931, also in some prior year periods, including 1918 to 1924. New York quotations are in depreciated currency after early March 1933. The commercial ratio is computed on the basis of London quotations through 1914; thereafter, on the basis of the New York average price. Beginning with 1934 the monetary value of gold is \$35.00 per fine ounce as compared with \$20.67+ in previous years. The value of fine silver (371.24 grains) in the dollar is computed on the basis of London quotations through 1917; thereafter, on the basis of the New York average price.

[All figures, except "Commercial ratio to gold," expressed in dollars]

No. 868.—COAL—PRODUCTION, 1921 TO 1943, AND BY STATES, 1916 TO 1943

NOTE.—Quantities in thousands of short tons (2,000 pounds); values in thousands of dollars. Includes coal consumed at mines. Figures for anthracite relate to Pennsylvania output only; those for bituminous relate to continental United States and Alaska. Bituminous coal includes lignite and small amounts of anthracite outside Pennsylvania. Comparatively little coal is held in stock at the mines.

Exclusive of product of mines producing less than 1,000 tons. ¹ Estimated from various sources; includes selling expenses, except for 1940, when such expenses were excluded except in a few cases.

Preliminary.

Included with Kansas.

² Includes Oklahoma.

³ Includes South Dakota.

⁴ Includes Missouri.

⁵ Included with Arkansas.

Sources: Department of the Interior, Bureau of Mines. Data now compiled in cooperation with Solid Fuels Administration for War. Published in Minerals Yearbook.

¹ Figures for bituminous coal represent average value per ton less selling expense (Bur. of Mines series) prior to 1937; thereafter, average gross realization including selling expense (Bit. Coal Div. series).

² Based on total production as shown in table 863.

³ Calculated at 303.5 working days in the anthracite field and 305 working days in the bituminous field.

⁴ Of 2,000 pounds.

⁵ Not available.

⁶ 1891.

⁷ 1896.

¹ Limited to classes shown. Bunker-fuel statistics not available for publication.

² Geological Survey and Federal Power Commission. Represents consumption by public utility power in power generation, including a small quantity of coke amounting to approximately 100,000 tons.

³ Association of American Railroads. Represents consumption by class I railways for all uses, including live, powerhouse, shop, and station fuel. The I. C. C. reports that in 1942 consumption for all class I line-haul railways plus purchases for class II and class III railways, plus purchases by all long and terminal companies combined, was 122,206,206 net tons of bituminous coal and lignite. Data not yet available for 1943.

⁴ Figures based upon reports collected by Solid Fuels Administration for War from a selected list of intensive manufacturing plants.

⁵ Preliminary.

⁶ Department of the Interior, Bureau of Mines. Data now compiled in cooperation with Solid Fuels Administration for War. Published in Minerals Yearbook.

67.—STRIKES AND LOCKOUTS IN ANTHRACITE AND BITUMINOUS COAL MINING INDUSTRIES, BY MAJOR ISSUES INVOLVED: 1931 TO 1943

and lockouts involving fewer than 6 workers or lasting less than 1 day are not included. Figures are strikes beginning in years shown. For combined statistics covering strikes and lockouts in all mines, see table 172, p. 172.]

No. 869.—NATURAL GAS AND NATURAL GASOLINE—PRODUCTION, 1906 TO 1943, AND BY STATES, 1930 TO 1943

NOTE.—Quantities of gas in millions of cubic feet, of gasoline in thousands of gallons; values in thousands of dollars. Production figures for gas refer only to that marketed, in addition to which considerable quantities are used by producers, and large quantities are wasted or lost. Values given are at the point of consumption. Consumption figures by States differ greatly from production figures by reason of interstate transportation.

Co. 870.—MANUFACTURED-GAS INDUSTRY—FUEL CONSUMED, BY KIND AND BY USE: 1936 TO 1943

Coal and coke in thousands of tons of 2,000 pounds; oil in thousands of gallons. Companies formerly distributing manufactured gas but which were distributing natural gas at the beginning of 1943 have been excluded from the figures for all years. The figures do not include fuels used in production of coke even gas which is purchased by gas companies from coke and steel companies for public distribution.

¹ Includes screenings.

² Includes fuel used in production of reformed oil refinery gas.

³ Oil used. For 1943, for carburizing water gas, 672,611,000 gallons; for making oil gas, 84,176,000 gallons; boiler fuel, 14,573,000 gallons.

Co. 871.—MANUFACTURED-GAS AND NATURAL-GAS INDUSTRIES—SUMMARY: 1936 TO 1943

Population served and number of customers in thousands; gas produced, purchased, and sold in millions of cubic feet; revenue in thousands of dollars. Companies formerly distributing manufactured gas, but which were distributing natural gas at the beginning of 1943 have been excluded from the figures for manufactured gas and included with those for natural gas for all years shown in this table. Companies selling mixed manufactured and natural gas are included with data for manufactured gas. Figures for natural gas do not include natural gas used in field operations or in the manufacture of carbon black, or gas used by distributing companies in the conduct of their gas operations.

¹ Quantities of stones not sold by the short ton are expressed in approximate equivalents in short ton expressed in their selling units, quantities for 1943 are as follows: Building stone (cut stone, slabs, and blocks), 1,182,930 cubic feet; monumental stone, 2,541,080 cubic feet; paving blocks, 651,880 (number) curbing, 147,760 cubic feet; and flagging, 416,850 cubic feet.

² To avoid disclosing confidential information, sandstone paving blocks are included under "curbing."
³ Limestone only.

rtment of the Interior, Bureau of Mines; annual bulletins, Metal Mine Accidents, Quarry Accidents at Metallurgical Plants, Coke Oven Accidents, and Coal Mine Accidents.

30. Manufactures

[Statistics in this section relate to continental United States except as noted. For additional statistics on manufactured food products, mineral products, and forest products, see sections 25, 26, 27, 28, and 29.]

GENERAL NOTE.—The Census of Manufactures was taken decennially prior to 1890 and for each 5th year thereafter through 1919, and has been taken every second year from 1921 to 1939. However, the Census of Manufactures for 1941 has been abandoned as directed by Executive Order No. 9152, in the interest of more important work related to the Nation's war effort. The censuses for 1904, 1909, 1914, and 1919 cover all factories or plants whose products were valued at \$500 or more, but, beginning with 1921, the minimum limit has been \$5,000. As a rule, the term "establishment" signifies a single plant or factory, but in some cases an establishment operates two or more factories and in a few cases two or more departments of a single plant or factory are treated as separate establishments. At the censuses for 1937 and 1939, however, an establishment operating two or more factories was counted as two or more establishments. The unit number of establishments was increased approximately 2,000 by this change.

"Value of products" represents selling value at the plant or factory. Because of the use of the products of some establishments as materials for others, the total cost of materials and the total value of products for all industries in a given group, and for all groups in the aggregate, include much duplication, estimated at roughly one-third of the gross value of products. Such duplication is not, however, found to any great extent within individual industries.

The 1939 Census of Manufactures questionnaire, for the first time, called for personnel employed in distribution, construction, etc., separately from the manufacturing employees of the plants, and therefore the data for earlier years probably are not strictly comparable with those for 1939. It is not known how many of the wage earners and the salaried employees reported at previous censuses were engaged in distribution and construction and how many were engaged in manufacturing.

It is sometimes necessary, for various reasons but chiefly because of changes in census classification, to make adjustments in the figures for earlier census years. Adjustments have been made in the figures beginning with 1899 as a result of the exclusion from the Census of Manufactures since 1929 of the industries "Coffee and spice, roasting and grinding," "Flax and hemp, dressed," "Gas, illuminating and heating," "Grindstones," "Motion pictures, not including projection in theaters," "Peanuts, walnuts, and other nuts, processed or shelled," and "Railroad repair shops" (both steam and electric).

Detailed quantity and value figures for products of selected manufacturing industries are presented in certain of the census tables in this section and in sections 25, 26, 27, and 29. The "total value" figures in the respective industries, as given in those tables, differ from the values of products of the corresponding industries, as given in table 902, because of the inclusion in the product-value totals in those tables, but not in the values of products for the corresponding industries in table 902, of data for the respective class of commodities made as minor or secondary products by establishments engaged primarily in other lines of manufacture.

No. 893.—MANUFACTURES—SUMMARY: 1849 to 1939

CENSUS YEAR	Number of establishments	Wage earners (average for the year)	Wages	Cost of materials, containers, fuel, and purchased energy	Value of products	Value added by manufacture ¹

¹ Value of products less cost of materials, containers, fuel, and purchased electric energy.

² For all establishments having products valued at \$500 or more.

³ Reduced to gold basis.

⁴ For all establishments having products valued at \$5,000 or more.

⁵ Includes cost of contract work.

⁶ Calculated by subtracting sum of cost of materials, containers, fuel, purchased electric energy, and cost of contract work from value of products. Not strictly comparable with years prior to 1935.

If the change from \$500 to \$5,000 in the minimum-value-of-products limit, the "Number of establishments reporting power" figures for 1919 and earlier years are not comparable with those for 1939. This change did not, however, materially impair the comparableness of the figures for 1939 in this table.

or "Logging camps and logging contractors (not operating mills)," numbering 967, were excluded from tabulations.

7,192 horsepower reported as other owned power, not distributed by type of prime mover.

8,313 horsepower reported as other owned power, not distributed by type of prime mover.

or "Steam engines" include data for "Steam turbines," not reported separately.

or "Other internal-combustion engines" include data for "Diesel and semi-Diesel engines," not reported separately.

data for water motors.

900.—INDUSTRIAL POWER REQUIREMENTS OF MANUFACTURING AND EXTRACTING INDUSTRIES: 1939 TO 1944

Based on reports filed by more than 5,000 manufacturing, industrial, and other establishments, each having connected electric load of 100 kilowatts or more. Use for 1944 was estimated. Data have been adjusted and expanded to Census coverage based on 1939 Census of Manufactures and 1940 Census of Mineral Industries.

(In millions of kilowatt-hours)

No. 901.—INVENTORIES IN THE HANDS OF MANUFACTURERS AT THE BEGINNING AND END OF 1937 AND 1939, AND BY INDUSTRY GROUPS, 1939

NOTE.—In thousands of dollars. Statistics on inventories were not collected for any of the industries in the printing and publishing group, nor were inventory statistics collected for contract shops classified in the textile industries. The value of products of those industries for which inventory data were not collected amounted to \$2,848,908,000.

**-MANUFACTURES—SUMMARY FOR INDUSTRY GROUPS, 1929 TO 1939,
AND FOR SUBGROUPS AND INDUSTRIES, 1937 AND 1939**

Figures given in this table do not represent exactly the numbers of wage earners, values of c., assignable to the classes of commodities from which the industries derive their names, necessary for census purposes to classify each establishment as a whole in some one industry. Its product of chief value, although in many cases a single establishment manufactures classes of commodities. See also general note, p. 794.

[contract work

figures available for 1929 and 1935.

as shown in *Italics* are comparable with the statistics for 1939 and include data for 3 estab-
lere originally classified in another group for 1937 and previous years but which have
ed in this group. The roman-type figures for 1937 do not include data for these 3 estab-
comparable with statistics for earlier years.

I.—MANUFACTURES—SUMMARY FOR INDUSTRIAL AREAS: 1937 AND 1939

The term industrial area signifies an area having as its nucleus an important manufacturing city comprising the county in which the city is located, together with any adjoining county or counties in which there is great concentration of manufacturing industry. The industrial areas by constituent area are as follows: Akron area—Summit County; Albany-Schenectady-Troy area—Albany, Rensselaer and Schenectady Counties; Allentown-Bethlehem area—Lehigh and Northampton Counties; Baltimore area—Baltimore City and Baltimore County; Boston area—Essex, Middlesex, Norfolk, and Suffolk Counties; Bridgeport-New Haven-Waterbury area—Fairfield and New Haven Counties; Buffalo and Niagara Counties; Chicago area—Cook, Du Page, Kane, Lake, and Will Counties, Ill., and DuPage County, Ind.; Cincinnati area—Butler and Hamilton Counties, Ohio, and Campbell and Kenton Counties, Ky.; Cleveland area—Cuyahoga and Lorain Counties; Dayton area—Montgomery County; Detroit area—Oakland and Wayne Counties; Hartford area—Hartford County; Indianapolis area—Marion County; Kansas City area—Clay and Jackson Counties, Mo., and Wyandotte County, Kan.; Los Angeles area—Los Angeles County; Milwaukee area—Kenosha, Milwaukee, and Racine Counties; Minneapolis-St. Paul area—Dakota, Hennepin, and Ramsey Counties; New York City-Newark-Jersey area—Bronx, Kings, New York, Queens, Richmond, and Westchester Counties, N. Y., and Bergen, Hudson, Middlesex, Passaic, and Union Counties, N. J.; Philadelphia-Camden area—Bucks, Delaware, Montgomery, and Philadelphia Counties, Pa., and Burlington, Camden, and Gloucester Counties, N. J.; Pittsburgh area—Allegheny, Beaver, Washington, and Westmoreland Counties; Portland-Fall River-New Bedford area—Providence County, R. I., and Bristol County, Mass.; St. Louis area—Berks County; Rochester area—Monroe County; St. Louis area—St. Louis City and St. Louis County, Mo., and Madison and St. Clair Counties, Ill.; San Francisco-Oakland area—Alameda, Contra Costa, Marin, San Francisco, and San Mateo Counties; Scranton-Wilkes-Barre area—Lackawanna and Luzerne Counties; Seattle-Tacoma area—King and Pierce Counties; Springfield-Holyoke area—Hampden County; Toledo area—Lucas County; Wheeling area—Brooke, Hancock, and Ohio Counties, W. Va., and Belmont, Columbiana, and Jefferson Counties, Ohio; Worcester area—Worcester County; Youngstown area—Mahoning and Trumbull Counties, Ohio, and Lawrence and Mercer Counties, Kan.

See also general note, p. 794.

[All figures except number of wage earners in thousands of dollars]

No. 905.—CHEMICALS—PRODUCTION, BY KIND, 1939 to 1944

[Data for chemicals shown are restricted to a selected group comprised for most part of inorganic chemicals and related products which are sufficiently important economically to justify publication. A few important items are excluded for security reasons or because comparable data are not available. Data production by Government-owned arsenals, ordnance works, and certain plants operated for Government by private industry are excluded, except that data for chemicals manufactured by Tennessee Valley Authority are included]

No. 907.—WOOLEN AND WORSTED MANUFACTURES—PRODUCTION, BY KIND, 1939 TO 1944

[Woolen and worsted woven goods are defined as fabrics containing by weight 25 percent or more wool fiber. Wool fiber means fibers as defined by the Wool Products Labeling Act of 1939. Data beginning with 1942 are not strictly comparable with those published in the census of Manufactures for 1939. Detailed information on military fabrics was required by the war agencies, and in most cases, information was collected by type of fabric rather than by end use. Consultations with the military agencies provided the basis for estimating the end use of each type of fabric. Fortunately, for purposes of comparison with 1939, the more important military fabrics were generally produced for a single end use in terms of the 1939 classification. The estimates occurred primarily in the men's wear fabrics, and involved less than 15 percent of the total apparel fabrics produced. Production figures of women's and children's wear fabrics were collected by weight of fabric instead of end use. In the Census of Manufactures in 1939 data were collected from this industry on a square-yard basis; the present series requires the reporting of linear yards, with narrow fabrics converted to a 54-inch width. The 1939 data have been converted to a 54-inch linear yard measure by dividing the quantity of square yards by 1 1/4, excepting blankets which were converted to a 72-inch linear yard measure by dividing the quantities of square yards by 2.]

¹ The measure used in 1939 was square yards. Data have been converted to a 54-inch linear yard measure, excepting blankets which have been converted to a 72-inch linear yard measure. Data for 1942, 1943, and 1944 on narrow fabrics were converted by reporting companies to a 54-inch linear yard measure.

² Includes data for military fabrics which were reported by types. Estimates as to end use classification were made on less than 15 percent of the total quantity of apparel fabrics.

³ Data for 1939 and for 1942 were collected as to end use. 1943 and 1944 data were collected by weight of fabric.

⁴ Data not available.

⁵ An unknown quantity of these fabrics are included in the women's and children's wear classification.

⁶ Includes data for papermakers' felts which were not collected separately for 1942.

¹ Cotton fabric data for 1939 include cotton, linen and cotton-warp mixtures. Rayon fabric data include rayon and silk, including mixtures.

² Rayon fabrics are defined as fabrics containing 51 percent or more rayon by weight. Rayon means synthetic yarns made by viscose, cuprammonium and cellulose acetate processes. An unknown quantity of fabrics made from nylon and other synthetic fibers are also included in the rayon yardage.

³ White finished rayon goods are included with rayon dyed goods.

⁴ Includes roller, screen, flock and block printed fabrics.

of "Books and pamphlets printed for publication by others," "Maps, atlases and globe covers," "Greeting cards printed for others," "Newspapers and periodicals printed for others," etc. results in duplication in the aggregate value and receipts, as follows: 1937, \$201,627,000. (No separate data available for greeting cards for 1937.) These amounts by commercial printers for work done by them for other printers or for publishers, and are twice into the aggregate value and receipts.

"Other commercial printing."

"Greeting cards."

Labels, tags, and seals were produced by methods other than letterpress, as follows: 1937, 20,944,000. 1929 figures are not available.

MACHINERY—VALUE OF THE PRINCIPAL CLASSES MANUFACTURED

in dollars. The various classes of machinery listed are products of a number of industrial machinery, not elsewhere classified," "Motor vehicles, motor-vehicle bodies, etc.," "Agricultural machinery (except tractors)," etc. This table is not an industry a special presentation giving value of products for groups designated. The values are in other tables in this Abstract such as tables 919, 922, and 923.

CLASS	1929	1932	1935	1937	1939

No. 919.—ELECTRICAL MACHINERY GROUP—VALUE, BY CLASSES: 1933 to 1939

[In thousands of dollars]

PRODUCT	1933	1935	1937	1939
Electrical machinery, total	643, 671	1, 124, 843	1, 535, 941	1, 746, 000
Wiring devices and supplies	33, 949	63, 559	109, 299	126, 340
Wiring devices	17, 796	24, 583	32, 008	34, 300
Wiring supplies	4, 702	12, 346	23, 667	25, 990
Insulators and insulating materials	(1)	(1)	16, 344	11, 000
Conduits and fittings	14, 692	23, 095	39, 443	35, 600
Lightning arresters and choke coils	1, 592	2, 871	5, 993	6, 600
Relays (excluding industrial motor-control and telephone)	166	664	2, 088	1, 600
Carbon products for the electrical industry, and manufactures of carbon or artificial graphite	5, 997	13, 479	26, 429	31, 000
Brushes and plates, rods, and powder for making brushes	2, 282	4, 150	6, 511	6, 000
Electrodes				10, 000
Other carbon and graphite products	6, 713	8, 329	13, 921	15, 000
Electrical measuring instruments	9, 169	22, 629	39, 696	37, 000
Measuring instruments and meters	9, 162	22, 622	39, 679	37, 000
Analyzers for testing the electrical and other equipment of internal-combustion engines and radio apparatus	(1)	(1)	2, 167	4, 000
Generating, distribution, and industrial apparatus, and apparatus for incorporation in manufactured products, not elsewhere classified	130, 961	241, 584	493, 735	604, 000
Generating apparatus and parts, except railway and vehicle power generators	14, 129	40, 978	60, 932	65, 000
Transformers, current-limiting reactors, and feeder-voltage regulators (except measuring-instrument transformers)	13, 094	28, 881	33, 613	35, 000
Rotating converting apparatus	2, 201	5, 862	10, 928	6, 000
Motors, except railway and vehicle motors (not including starters and controllers)	45, 606	72, 668	153, 295	152, 000
Fractional-horsepower	23, 746	32, 365	71, 723	55, 000
Number	3, 818	7, 019	20, 896	11, 000
1 hp. and over	17, 197	34, 562	67, 400	22, 000
Direct-current	3, 622	8, 489	15, 629	11, 000
Alternating-current	13, 574	26, 073	51, 771	31, 000
Number	172	894	521	500
Other motors and parts and supplies	4, 663	5, 740	14, 172	15, 000
Control apparatus (except railway and vehicle controllers, all types)	15, 165	28, 230	47, 388	46, 000
Fuses and fuse blocks (except high-voltage and power types, 2,300 volts and over)	4, 825	5, 013	7, 117	6, 000
Industrial and commercial apparatus and appliances	9, 698	23, 747	40, 697	34, 000
Switchboard apparatus (circuit breakers, panelboards, switchboards, and switches)	16, 243	36, 188	58, 743	75, 000
Panelboards and distribution boards	(1)	7, 896	16, 692	14, 000
Knife, power, and other switches	(1)	5, 382	13, 849	11, 000
Circuit breakers, including attachments and parts	(1)	8, 019	22, 452	17, 000
Power switchboards and parts	(1)	9, 008	21, 231	12, 000
Power switching equipment, power connectors, and distribution cut-outs and fuse links for 2,300 to 15,000 volts, a. c. service	(1)	6, 864	14, 730	11, 000
Electrical appliances	39, 770	80, 891	130, 783	134, 000
Fans (direct motor-driven)	2, 437	6, 095	16, 565	5, 000
Domestic cooking and heating equipment and other household appliances	36, 707	72, 457	112, 151	112, 000
Water heaters (for permanent installation)	432	3, 530	5, 606	2, 000
Cooking and heating appliances	14, 735	31, 589	54, 615	45, 000
Mixers, whippers, and juicers	(1)	9, 737	7, 372	6, 000
Number	(1)	(1)	7, 053	1, 000
Vacuum cleaners	14, 411	24, 191	36, 029	44, 000
Number	555	1, 112	1, 515	1, 000
Other	7, 129	3, 410	8, 530	9, 000
Commercial cooking apparatus and other commercial or domestic appliances	625	1, 739	3, 067	1, 000
Insulated wire and cable	65, 637	122, 226	245, 942	294, 000
Rubber insulated	25, 789	46, 242	90, 432	67, 000
Cotton insulated, including weatherproof and slow-burning	7, 248	12, 344	22, 680	26, 000
Asbestos insulated		3, 041	6, 330	4, 000
Paper insulated	6, 032	8, 129	33, 420	30, 000
Varnished-cambric insulated	1, 979	4, 121	9, 140	3, 000
Magnet	10, 341	16, 899	29, 805	25, 000
Armored cable or conductor	4, 411	6, 845	8, 917	12, 000
Ignition-cable sets or wire assemblies for internal-combustion engines	(1)	(1)	13, 389	7, 000
Other	10, 039	24, 606	31, 038	28, 000

No. 927.—COTTON SPINDLES, COTTON CONSUMPTION, AND STOCKS

NOTE.—The statistics for 1915 to 1944 relate to the 12 months ended July 31 and those for previous years to the 12 months ended Aug. 31. Consumption and stocks are expressed in running bales, counting and as half bales, except that all figures, 1840 to 1870, inclusive, and foreign cotton for all years are in equivalent 500-pound bales. The number of active cotton spindles represents spindles operated at some time during the year, and is not as satisfactory a measure of activity of the industry as active spindle hours.

¹ Includes linters for 1840 to 1906. Figures for all years include foreign and domestic cotton.

² Not available. ³ Cotton mills only. ⁴ Includes linters for 1906 to 1908. ⁵ Average, 1909 and 1910.

⁶ Includes stocks held in public storage and at compresses beginning 1938.

⁷ "Upland" includes "American-Egyptian" beginning 1912 (first year produced). ⁸ Less than 500 bales.

Source: Dept. of Commerce, Bur. of the Census; annual report, Cotton Production and Distribution.

—COTTON SPINDLE ACTIVITY, 1942, 1943, 1944, AND COTTON CONSUMPTION, 1936 TO 1944, BY STATES

ended July 31. Consumption includes domestic and foreign cotton and is in running bales of 500 pounds, except foreign cotton which is in equivalent 500-pound bales.

ier (first manufactured for general sale in 1925) is included with granular powder.
manufacturer, but later returned unused to him

artment of the Interior, Bureau of Mines, Production of Explosives in the United States.

No. 980.—TOBACCO PRODUCTS—PRODUCTION, BY KIND

[Compiled from monthly returns of manufacturers. Data relate to products manufactured in the United States, excluding those manufactured in bonded manufacturing warehouses. There were 221,221 large cigars manufactured in these warehouses in 1943. Large cigars are those weighing not less than 3 pounds per thousand.]

¹ Includes scrap chewing tobacco.

² Factories producing a taxable product, excluding 165 "quasi" manufacturers. * Less than 500.

Source: Treasury Department, Bureau of Internal Revenue; Annual Report of the Commissioner.

I.—TOBACCO, LEAF—AMOUNTS CONSUMED IN THE MANUFACTURE OF CIGARS, CIGARETTES, CHEWING AND SMOKING TOBACCO, AND SNUFF

Figures in thousands of pounds. Figures represent the equivalent in unstemmed leaf tobacco of leaf or scraps, cuttings, and clippings. In the following table the tobacco used in the manufacture of cigars and cigarettes was converted on the basis of 2 pounds of stemmed leaf or scraps, etc., to 4 of unstemmed beginning 1915 (conversion prior to 1915 was at the ratio of 3 to 5) and of tobacco of beginning 1903. For 1896 to 1902, tobacco used in manufactured tobacco and snuff was shown in two heads, namely "leaf" and "scraps." It is probable that stemmed leaf was included in tobacco under the head of "leaf" without the one kind being converted to the equivalent of the other. The conversion ratio of 3 to 4 was applied only to "scraps" for these years. Data exclude tobacco in bonded manufacturing warehouses.

not more than 31 wine gallons. ¹ Excludes ethyl alcohol.

² For spirits of 100 proof or over is equivalent to the proof gallon. For spirits of less than 100 proof is equivalent to the wine gallon.

³ High-proof spirits and unfinished spirits produced at registered distilleries. Not available for 1944.

⁴ Represents total amount removed from fermenters, including distilling material (substantially produced with excessive water or residue materials). In 1944, 104,678,000 gallons of distilling material produced.

⁵ United States gallon.

⁶ Distilling materials.

⁷ Champagne, other sparkling wines, and artificially carbonated wines.

⁸ Available on each 1/4-pint or fraction thereof in each bottle or container.

. 935.—MOTION-PICTURE PRODUCTION—SUMMARY: 1921 TO 1939

Money figures are in thousands of dollars. Data represent the activities of the motion-picture and laboratories. They do not include the distribution of films and their projection in theaters. are included for establishments which reported less than \$5,000 as the cost of work done. The picture industry has been canvassed, since 1921, in connection with the Biennial Census of Manufactures. It is not, however, a manufacturing industry, but was treated as such prior to 1931.

No. 937.—ALASKA—MANUFACTURES, BY INDUSTRIES: 1899 TO 1939

NOTE.—The figures for 1939 do not include data for plants reporting products valued at less than \$500. Those for earlier years cover all plants having products valued at \$500 or more. This increase in the minimum value-of-products limit resulted in some reduction in the "Number of establishments" reported as compared with what it would have been had the minimum of \$500 been retained, but did not seem to impair the comparableness of the figures for 1939 with those for earlier years. Comparable figures for earlier years are given for all industries for which such figures are available.

¹ Value of products less cost of materials, etc., fuel, purchased electric energy, and contract work.

² Figures include data for coffee roasting and spice grinding which are no longer treated as manufacture activities.

³ Except butter and cheese, canned tuna, rice cleaning and polishing, meat packing and sausage manufacturing, and vegetable oils and sirups. See note 14.

⁴ Combined to avoid disclosing, exactly or approximately, data for individual establishments or companies.

⁵ Distilled liquors, 1 establishment; malt liquors, 2; sake, 5; wines, 1.

⁶ Figures for this industry relate solely to sugar mills, and do not include data for sugarcane plantations.

⁷ Reported as confectionery and ice cream.

⁸ Concrete products, 2 establishments; stone products, 2; lime, 2; pottery, 1.

⁹ Iron castings, 1 establishment; steel products, 4; machine-shop products, 2.

¹⁰ Jewelry, 6 establishments; silverware, 1; electroplating, 1.

¹¹ Picture frames, 1 establishment; Venetian blinds, 3.

¹² Products of planing mills not operated in conjunction with sawmills.

¹³ Book publishing and printing, or publishing only, 2 establishments; job printing, 21; lithographing, 1; photoengraving, 1.

¹⁴ Boat building and repairing, 5 establishments; brooms, 2; butter and cheese, 3; canned tuna, 3; catch 1; cushions, pillows, and quilts, 1; drugs, medicines, perfumes, 3; insulation board, 1; lighting fixtures, 1; machinery, farm, 1; machinery, sugar-mill, 1; mats, 1; meat packing, sausage manufacturing, 4; paper goods, 5; prepared feeds, 1; rice cleaning and polishing, 2; skirts, hula, 1; suitcases and trunks, 1; tin can; vegetable oils and sirups, 2. Figures for these industries are combined to avoid disclosing data reported by individual establishments.

ude patents for inventions, designs, and reissues of patents. Includes applications without fees.

r period from July 28, 1836, to Dec. 31, 1850, except as otherwise specified

* 11 years beginning 1840; records prior to this date are not available.

* 8 years beginning 1843.

* Data are for 13 years beginning 1836.

r the year 1870

* Data are for 7 years beginning 1874.

r of labels suspended from May 27, 1891, to June 9, 1896

* 8 years, first print registered Mar. 7, 1893.

* Data are for the year 1925.

r 1940 are for the six months period ended June 30, 1940. On July 1, 1940, jurisdiction of
els was transferred to the Copyright Office, Library of Congress, and data concerning them
y that organization (See table 939.)

artment of Commerce, United States Patent Office; records (not published elsewhere).
ures published in Annual Report of the Secretary.

31. Distribution and Services

[Data in this section relate to continental United States]

No. 941.—MANUFACTURERS' SALES—DISTRIBUTION, BY PRIMARY CHANNEL BY INDUSTRY GROUPS: 1929, 1935, AND 1939

NOTE.—No data are included for the following classes of industries: (1) Those in which no sales were made the plants being maintained for the purpose of making repairs, (2) those in which plants were engaged primarily in performing labor on materials owned by others so that their sales represented sales of services rather than commodities. This table is limited to industries for which the 1929, 1935, and 1939 figures are directly comparable, whereas table 942 covers all industries for which 1939 figures are available. For comparative purposes, data covering direct export are excluded.

INDUSTRY GROUP	TOTAL DISTRIBUTED SALES, 1939		DISTRIBUTED SALES, 1939, COMPARABLE WITH 1929 AND 1935		PERCENT OF DISTRIBUTED SALES MADE TO—

¹ Includes sales of certain milk dealers in the amount of \$130,000,000, not included in tables 949 and 953. Data for these concerns were received too late for inclusion in summary tables for 1929.

² Much of the increase in sales of filling stations from 1929 to 1939 results from a change in classification. Garages primarily selling gasoline and oil were classified separately as garages in the 1929 Census Trade and were included in the filling station category in the 1939 Census of Retail Trade.

³ Comparable data are not available.

Source: 1929, 1933, 1935, and 1939, Department of Commerce, Bureau of the Census; Census of 1939, Vol. 1, Retail Trade, Part 3. Other years, estimates by Department of Commerce, Bureau of and Domestic Commerce, based on trends shown by statistics available currently, published in Survey of Current Business.

No. 957.—SALES OF NEW PASSENGER AUTOMOBILES—INDEXES OF DOLLAR SALES ADJUSTED FOR SEASONAL VARIATIONS: 1929 TO 1941

[The index represents consumer outlay on new passenger automobiles relative to the base period 1935. It is based on the actual number of new cars sold by dealers each month, converted to a dollar basis by application of an estimated average price per car. The number of cars sold was reported each month by the Automobile Manufacturers' Association and represented 95 percent of all dealers' sales. Sales discontinued for the duration of the war.]

(Daily average basis, 1935-39=100)

¹ Employees and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.

² Statistics for 1935, adjusted for comparison, are as follows: Number of establishments, 631,309; receipts, \$3,000,000,000. The adjustment was made by revising the original 1935 figures to include certain kinds of business that were not included in the Service Census but were published in other census reports and by excluding others which were within the scope of the 1935 census but were omitted from the 1939 census. For a comparison of the two items by industries, see source.

³ For figures for earlier years, see table 961, p. 886.

⁴ Includes manufacturing plants with products valued at less than \$5,000 and therefore not covered by the Census of Manufactures.

Source: Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. III, Service Businesses.

160.—SERVICE ESTABLISHMENTS—SUMMARY, BY STATES: 1939

ness of service establishments covers a heterogeneous group of establishments (see table primarily in the sale of service, as distinguished from establishments dealing in merchandise in the financial, educational, transportation, construction, and diverse other business activity, many of which are covered elsewhere, are not included. Owing to difference of the 1935 and 1939 censuses of service establishments, the aggregates for 1939 are not with those for 1935 as published in the 1937-40 issues of the Abstract.

¹ Pay roll include paid executives of corporations but not number and compensation of part-time businesses. ² See note 2, table 160.

U. S. Department of Commerce, Bureau of the Census; Census of Business, 1939, Vol. III, Service

No. 961.—POWER LAUNDRIES, CLEANING AND DYEING ESTABLISHMENTS, AND RUG CLEANING ESTABLISHMENTS—SUMMARY: 1919 TO 1939

NOTE.—All money figures in thousands of dollars. Statistics cover establishments reporting receipts \$5,000 or more, except for 1939 figures in italics, which represent establishments reporting receipts of \$100 or more. The Census of Business for 1939 classified the establishments shown in this table as service establishments and covered those reporting receipts of \$100 or more. See also table 959 for statistics in 1939. Statistics for 1935 and earlier years were compiled in connection with the Census of Manufactures. Rug cleaning was treated, in general, as an activity of the power laundry industry for 1929 and earlier years.

YEAR	Number of establishments	Proprietors and firm members	Salaried employees	Wage earners (average for year)	Salaries	Wages	Cost of supplies, fuel, and purchased electric energy	Cost of contract work	Receipts for work done
Power laundries:									
1919	4,881	(1)	(1)	180,489	(1)	91,926	52,842	1,555	22,28
1925	4,859	3,851	15,412	169,200	31,613	162,466	55,407	1,197	302,25
1929	6,776	5,220	21,964	233,187	49,833	228,861	80,265	(7)	541,10
1935	6,316	4,244	19,920	208,854	34,586	154,791	62,796	2,356	280,48
1939	5,976	4,333	(3)	247,607	(4)	233,076	(1)	(1)	451,68
1939	6,775	5,174	(3)	249,008	(4)	233,606	(1)	(1)	452,53
Cleaning and dyeing establishments:									
1919	1,748	(1)	(1)	18,408	(1)	17,866	11,511	461	22,13
1925	2,406	2,263	5,769	29,386	10,550	37,590	15,188	814	102,19
1929	5,296	4,912	9,244	59,148	20,390	75,931	26,837	(7)	201,25
1935	5,510	4,980	9,334	57,286	12,483	49,792	21,656	1,129	120,67
1939	7,219	7,280	(3)	78,492	(4)	77,649	(1)	(1)	171,67
1939	11,604	11,845	(3)	82,810	(4)	80,014	(1)	(1)	182,60
Rug cleaning establishments:									
1935	506	395	670	2,344	1,136	2,260	1,211	99	1,00
1939	498	406	(3)	3,108	(4)	3,760	(1)	(1)	1,17
1939	1,019	949	(3)	5,489	(4)	5,968	(1)	(1)	10,60

¹ No comparable data.

² Included in figure for cost of supplies, fuel, and purchased electric energy.

³ Data for "Salaried employees" included in "Wage earners (average for year)."

⁴ Data for "Salaries" included in "Wages."

No. 962.—HOTELS—SUMMARY, 1929 TO 1939, AND BY SIZE, 1939

NOTE.—The census coverage of hotels is restricted, in the main, to establishments which are designated as hotels and which provide hotel accommodations as their major business activity. For 1935 and 1939, the canvass was limited to hotels having at least 6 guest rooms or having receipts from room rentals amounting to at least \$500 for a full year's operations. Because of differences in coverage for 1929, 1933, 1935, and 1939, comparable data are available only for year-round hotels having 25 or more guest rooms.

YEAR	Number of hotels	Number of guest rooms	Receipts (thousands of dollars)	Employees, full-time and part-time (average for year) ¹	Total pay roll (thousands of dollars) ¹
All hotels:					
1935	28,822	1,428,646	720,145	291,165	191,54
1939	27,987	1,444,390	863,155	338,029	243,25
Year-round hotels with 25 or more guest rooms:²					
1929	11,873	1,005,684	873,508	267,903	232,17
1933	10,680	890,866	308,674	190,183	113,60
1935	11,373	934,661	565,317	234,491	155,60
1939	11,836	983,756	686,305	279,155	202,07

ITEM	SIZE OF HOTEL, 1939 (NUMBER OF GUEST ROOMS)				
	Less than 25 rooms	25 to 49 rooms	50 to 99 rooms	100 to 299 rooms	300 rooms and over
Number of hotels	12,136	8,156	4,626	2,521	56
Receipts (1,000 dollars)	62,275	78,967	119,631	258,972	243,53
Active proprietors of unincorporated businesses	12,025	7,702	3,350	907	3
Employees, full-time and part-time (average for year) ¹	20,285	30,273	47,578	108,458	131,43

¹ Employees and pay roll include paid executives of corporations but not number and compensation of proprietors of unincorporated businesses.

² No data included for California, as comparable figures for all years are not available.

³ Based on number of employees for April, July, October, and December.

32. Construction and Housing

CONSTRUCTION IN THE UNITED STATES—ESTIMATED EXPENDITURES FOR PUBLIC AND PRIVATE CONSTRUCTION: 1929 TO 1944

represent the value of work performed during the year, as measured by expenditures for , and other items. They consequently differ from building permit and construction which measure the value of work started. In addition, they have a generally broader permit and contract data. Figures include value and cost of installation of equipmentegral part of a structure, but not that of machinery, shipbuilding, or land costs. For es, 1918-28, approximately comparable with data below, see Statistical Abstract, 1942,

new private nonfarm residential construction prepared by the Bureau of Labor Statistics. residential building by privately-owned public utilities and nonresidential farm con-

rial and commercial building included in data for private construction in 1929-33. mments, aeronautical facilities, navy yards and docks, Army and Navy hospitals, etc. h 1941, based on data prepared by the Construction Research Section of the Bureau of atistics of the War Production Board.

truction expenditures for such municipal enterprises as electric light and power plants, id other transit systems, gas systems, ports, docks, harbors, ferries, airports, terminals, id miscellaneous Federal construction.

nt estimates of the Department of Commerce, War Production Board, and Department

of Commerce, Bureau of Foreign and Domestic Commerce; Survey of Current Business, published currently in Survey of Current Business.

No. 966.—NEW DWELLING UNITS IN NONFARM AREAS, BY TYPE: 1920 TO 1943

[Figures are estimates covering construction of all new family dwelling units in the nonfarm areas of the United States, based upon building-permit reports. This area consists of all urban and rural nonfarm places. The urban designation is applied to all incorporated places with a population of 2,500 or more in 1940, and, by special rule, to a small number of unincorporated civil divisions. Rural nonfarm construction includes all construction for nonagricultural use in unincorporated areas and incorporated places of less than 2,500 population. Hence, urban construction is classified by location, whereas rural nonfarm construction is classified according to the intended use of individual buildings]

YEAR	Total non-farm	AREA ¹		TYPE OF DWELLING

19.—CONSTRUCTION CONTRACTS AWARDED IN 37 STATES—VALUE OF CONSTRUCTION AND FLOOR SPACE OF BUILDINGS, BY CLASS OF CONSTRUCTION: TO 1943

For State figures, see table 970. Public works and public utilities cover some projects not measurable in terms of floor space, such as highways, pipe lines, subways, etc. Statistics for the 37 States were compiled for years prior to 1928, but available figures covering a varying number of States for earlier years have been published in the 1932 and previous issues of the Statistical Abstract. Figures for the Federal States and districts in table 970 represent the value of construction contracts awarded in the Federal States and districts where the work was actually done.

Values in millions and tenths of millions of dollars; floor space in thousands of square feet

change in classification, data for airports have been excluded from "Commercial" class and in "Public utilities" for 1930 and subsequent years. Separate figures for airports are not available prior to 1930.

change in classification, figures for "Industrial" class exclude data for pipe lines for 1929 and years (separate figures not available for years prior to 1929), which data are included with those utilities.

include data for 23 projects, valued at \$29,551,000, for which data by class of construction are not available. These projects were under Civil Works Program, which was not in existence after March 1933.

by F. W. Dodge Corporation, New York, N. Y.; Statistical and Research Division, historical figures published currently in Statistical Research Service.

The F. W. Dodge Corporation, New York, N. Y.: Statistical and Research Division, historical figures published currently in Statistical Research Service.

2.—CONSTRUCTION CONTRACTS AWARDED—INDEXES OF VALUE: 1919 TO 1944

1919 average=100. Indexes are derived from monthly figures of construction contracts awarded by the F. W. Dodge Corporation. Reports covered 37 States beginning with May 1934 and a number for earlier years. In order to obtain comparable figures from 1919 to date, the total value of construction contracts awarded in 37 States was estimated for January 1919 through April 1924. Resubmissions were computed separately for "residential" and "all other" types of construction and then combined. The indexes are based on a 3-month moving average, centered at the middle of the year. For a more detailed description of the indexes, see the Federal Reserve Bulletin for July 1931.

**No. 978.—BUILDING CONSTRUCTION IN CITIES OF 50,000 OR MORE INHABITANTS
—PERMIT VALUATION OF ALL CONSTRUCTION AND NUMBER OF NEW DWELLING
UNITS: 1939 TO 1943:**

[Valuation figures are derived from estimates of construction costs made by prospective private bidders when applying for permits to build and the value of contracts awarded by Federal or State Government. No land costs are included. For type of building covered see table 967. Cities shown had a population of 50,000 and over in 1940]

Appraisal Co. Average for 30 cities of 4 types of buildings: Wood frame, brick-wood frame, reinforced concrete. Mechanicals not included. Based on actual appraisal costs. Available cities. Recently revised to include adjustments for social security taxes, unemployment corresponding "overhead."

General Contractors of America. Wages and materials for 12 cities combined in 40-60 ratio. High rates for hod carriers and common labor. Materials, weighted: sand, gravel and crushed stone, 1; lumber, 1; hollow tile, 1/2; structural and reinforcing steel, 1/2.

News Record construction cost index has 4 components: (1) Structural steel shapes, base at Chicago; (3) lumber, which until 1935 was 12 x 12 long leaf yellow pine wholesale at New York; (4) common labor, average of wage rates in force. This construction cost index is designed to predict changes in trends and to measure the movement of construction costs in general. It is not intended for a specific class of construction or to a particular locality. ENR Building Cost index: In construction cost index has been used widely to apply to building costs, and when common rates move in similar trends it is a satisfactory measure of relative building cost movement. During the low wage rates of 1932, common labor climbed much faster than skilled and reached high by July 1937. The increase was in the lower ranges between union and nonunion. When wages became synonymous with union wages the gap closed up, hence the ENR 20-city increased more rapidly than the union rates. To provide a more representative measure of movement, the skilled labor trend has been substituted for the common labor trend in the ENR Building Cost index, and the ENR Building Cost index computed.

McGraw-Hill & Assoc., Inc. Individual series for 10 types of buildings for 16 areas. Weights based on actual building costs—vary with different type of structures. Material prices are those paid by material dealers. Prevailing skilled and common wage rates from contractors. Base: Average, 1926-29=100. Series given here is brick and concrete, New York, converted to New England, 7-story and basement (62'4" x 202'4"), reinforced concrete building built quarterly as a construction bid to duplicate original building. Labor costs based on current with similar construction.

Fuller Company. Composite of 36 major cost elements, in 3 commercial-type building, mechanicals, elevators, wiring, heating and ventilating, repriced.

Construction Co. Eastern cities. Own building cost experience applied to these factors: Material prices, productivity of labor, efficiency of plant and management, competitive

No. 975.—MATERIALS CONSUMPTION FOR NEW CONSTRUCTION: 1944

[Data represent quantities of materials required by construction activity, both public and private in United States during 1944. They are divided into 4 major categories: (1) Military, which covers Army and Navy establishments, camps, cantonments, hospitals, airfields and bases, storage facilities, etc. (2) Plant expansion, which includes the construction of industrial plants engaged in the production of ships, aircraft, and other war materials. (3) Housing, which represents civilian, nonmilitary housing, and (4) All other nonmilitary construction such as schools, hospitals, commercial establishments, etc. roads, sewer and water development, farm construction, and utilities. Estimates do not include metals consumed in the manufacture of machines, machine tool and processing equipment. Full details are available in the source publication]

No. 978.—CONSTRUCTION—SUMMARY, BY KIND OF CONTRACTOR, BY GROUPS: 1939

NOTE.—The 1939 Census of Construction covered all persons or establishments whose principal business in 1939 was utilizing construction materials and labor in construction work for others, or for themselves for speculative and investment purposes, on projects located within the limits of continental United States. It included erection and installation departments of manufacturers and merchandisers, who was an important but not necessarily major portion of their business enterprise. Force-assembly ship and boat building, and installation and servicing of domestic appliances were not included. "Work performed" represents contract or order value of work done by the contractor's or builder's own work sublet to others was not included as work performed in the report of the builder or general contractor, but was reported as part of the business of the special trade contractor who received the contract. "Construction work" includes alterations and repairs, as well as new construction additions. Data for establishments reporting less than \$500 of work performed in 1939 are not included. The canvass is known to have been incomplete in coverage of small contractors who operated from homes. Most of this shortage occurred in metropolitan districts. It is believed that this undercount affects materially only number of establishments and number of proprietors.

CONSTRUCTION—SUMMARY FOR ESTABLISHMENTS REPORTING BUSINESS OF \$25,000 OR MORE, BY STATES: 1929 AND 1939

1939 comparisons must be limited to establishments reporting business of \$25,000 or more and covered only that size group. That size group in 1939 accounted for 77 percent of total performed by all contractors and builders regardless of size. Geographic distribution is address of reporting establishment, not location of construction project.

No. 957. - OCCUPIED DWELLING UNITS OR FAMILIES, BY TENURE: 1890 TO 1940

(Figures for 1940 are based on occupied dwelling units and are not strictly comparable with data for families, but the differences are so small as to be negligible. Figures for 1900 and 1930 represent families only; those for 1890, 1910, and 1920, include a small number of quasi-family groups)

No. 989.—DWELLING UNITS, URBAN AND RURAL, BY OCCUPANCY AND TENURE, BY AVERAGE AND MEDIAN MONTHLY RENT: 1940

[For urban and rural-nonfarm units, monthly rent includes land; for farm units, land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of reported value.]

No. 990.—DWELLING UNITS, URBAN AND RURAL, BY ESTIMATED TOTAL MONTHLY RENT AND ESTIMATED TOTAL VALUE: 1940

[For urban and rural-nonfarm units, monthly rent and value include land; for farm units, land is excluded. Monthly rental data include contract rent of tenant-occupied nonfarm units and estimated rent of other units. Monthly rent of owner-occupied rural-farm units is an estimate based on 1 percent of value. Value of owner-occupied units represents the owners' estimate of the value. For tenant-occupied and vacant units value was estimated as 100 times the monthly rent. Value or rent of units for which these data were not reported was estimated by assuming that the average value or rent of such units was the same as the value or rent of reporting units in the corresponding tenure and occupancy group in the urban and rural areas of each region.]

[In thousands]

SUBJECT AND OCCUPANCY STATUS	Total	Urban	Rural- nonfarm	Rural- farm
Estimated total monthly rent of all dwelling units.....	\$893,715	\$668,362	\$148,565

No. 994.—DWELLING UNITS, URBAN AND RURAL—NONE OR ESTIMATED MONTHLY RENT AND MEDIAN VALUE

NOTE.—The median may be defined as that item which is in the middle to size. Thus, the median rent is the rent which divides the total number of groups, one having rents higher than the median and one having rents lower than the median. The median value is the value which divides the total number of units, one having values higher than the median and one having values lower than the median. Figures for "All dwelling units" include vacant units.

¹ of median, see headnote, table 994.

² are limited to owner-occupied nonfarm units in structures without business and contain-
ing 4 dwelling units; percent represents percent of reporting owner-occupied units which were
of total number of owner-occupied urban and rural-nonfarm units, see table 996.

Department of Commerce, Bureau of the Census; Sixteenth Census Reports, Housing, Vol. II,

No. 1004.—DWELLING UNITS, OCCUPIED URBAN AND RURAL, WITH 1.51 OR MORE PERSONS PER ROOM, BY STATES: 1940

NOTE.—Figures exclude units for which the number of persons per room was not reported. For the number of occupied units, see table 988.

33. Climate

CLIMATIC DATA OF SELECTED CITIES, BY MONTHS

data are gathered by the United States Weather Bureau at 5,500 stations, about 500 having hourly readings and the remaining 5,000 taking 1 observation a day. Observations have been of varying lengths of time at each station. The earliest year of record is 1871 at many stations, and earlier, less detailed records began in the eighteenth century.

The tables contain data from a carefully selected list of cities, chosen to give as general representative climatic factors as is possible in the limited space available. The "Normals" are standard by the Weather Bureau as representative of conditions in the local area. These data are adopted from long-record stations in the vicinity when the period of record is not the same as for the standard.

In all other tables the averages represent the customary arithmetic average of the period of observation. Temperature data are in degrees Fahrenheit, precipitation in inches and hundredths, and snow-fall in inches. Wind data are corrected to true velocities.

The number of degree days as used in these tables is the sum of the positive differences between 65° and the actual temperatures. Experience has shown that, for buildings requiring an inside temperature of 70°, the amount of fuel or heat used per day is proportional to the number of days the average temperature falls below about 65°. The degree day is based on this principle.

Humidity data represent averages based on three to four daily observations.

Department of Commerce, Weather Bureau; records.

34. Public Lands

General Note

The term "public lands," as used here, includes only those Federally owned lands to which the general body of public land laws apply. (See title 43 of the *Code of Federal Regulations*.) In general, it includes the lands acquired by the United States through cession and treaty and certain other lands declared by Congress specifically to be "public lands," that is, subject to the public land laws. As a general rule, it excludes lands acquired by the United States from private owners and from State and local governments by purchase, donation, condemnation, etc. The term "Indian lands," used here to differentiate Indian lands from other public lands, refers to lands ceded to the United States by Indian tribes and held in trust for the Indians by the Government.

An entry or selection is a claim to a given tract of public land. An original entry or selection is a claim allowed under the law but subject to certain conditions before title can pass. A perfected entry is a claim finally approved after required lapse of time and compliance with other conditions. A patent certification is an instrument of conveyance or grant to a claimant whose entry or selection has been approved.

For table on trend in land utilization, see p. 604.

No. 1023.—PUBLIC AND INDIAN LAND, ENTRIES UNDER ALL ACTS—ACRES, STATES; YEARS ENDED JUNE 30, 1926 TO 1944

NOTE.—Offices are not maintained in States where only small areas of public lands remain undisposed of. Entries in these States, if any, are made directly in the General Land Office (Washington, D. C.) figures are grouped under that heading in the following table. See also general note above.

No. 1031.—PUBLIC LANDS, UNAPPROPRIATED AND UNRESERVED—ACREAGE, IN STATES: JUNE 30, 1900 TO 1944

NOTE.—Public lands outside Alaska were withdrawn from all disposition with certain exceptions by Executive orders issued in 1934 and 1935, in furtherance of the Taylor Grazing Act and for conservation and development of natural resources. Figures exclude unappropriated and unreserved public lands in Alaska estimated at 323,000,000 acres on June 30, 1942.

Territory.

1 Quinalt Lake, 7,024 acres of water area.

2 Ceded lands amounting to 1,472,000 acres. All other years included ceded land.

Department of the Interior, Office of Indian Affairs; Statistical Supplement to Annual Report of Commissioner of Indian Affairs.

APPENDIX

UNITED STATES UNITS WITH METRIC EQUIVALENTS

- 1 inch=2.540 centimeters.
- 1 foot=0.3048 meter.
- 1 yard=0.9144 meter.
- 1 mile=1.609 kilometers.
- 1 square yard=0.8361 square meter.
- 1 acre=0.4047 hectare.
- 1 square mile=2.590 square kilometers.
- 1 cubic inch=16.39 cubic centimeters.
- 1 cubic foot=0.02832 cubic meter.
- 1 cubic yard=0.7646 cubic meter.
- 1 liquid quart=0.9463 liter.
- 1 gallon=231 cubic inches=3.785 liters.
- 1 bushel (measured)=2,150.4 cubic inches=35.24 liters.
- 1 avoirdupois ounce=28.35 grams.
- 1 troy ounce=31.10 grams.
- 1 pound=0.4536 kilogram.
- 1 long ton=2,240 pounds=1.0160 metric tons of 1,000 kilograms.
- 1 short ton=2,000 pounds=0.9072 metric ton.

UNITED STATES GALLON AND BUSHEL WITH BRITISH EQUIVALENTS

- 1 United States gallon=231 cubic inches=0.8331 imperial gallon.
- 1 United States bushel=2,150.4 cubic inches=0.9694 imperial bushel.

OFFICIAL WEIGHTS OF THE BARREL OF NONLIQUID PRODUCTS

	Pounds	Kilograms

Oats.....	32	15
Peanuts, green, in shell.....	22	10
Castor beans.....	50	23

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

In the United States petroleum and its products are measured by bulk, weight. Whether handled in containers or without them the quantities are commonly reduced to the equivalent of barrels of 42 United States gallons (which thus equals 158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages the Department of Commerce in converting foreign weight statistics to gallons or barrels of 42 gallons uses the factors shown in the following table.

	WEIGHT OF UNITED STATES GALLON		WEIGHT OF BARREL OF 42 GALLONS	
	Pounds	Kilograms	Pounds	Kilograms
Crude petroleum.....	7.3	3.311	306.6	139.1
Lubricating oils.....	7.0	3.175	294.0	133.3
Illuminating oils (kerosene).....	6.6	2.994	277.2	125.7
Gasoline and related products (motor spirit, benzine, etc.).....	6.1	2.767	256.2	116.6
Fuel and gas oils.....	7.7	3.493	323.4	146.8

BIBLIOGRAPHY OF SOURCES OF STATISTICAL DATA

GENERAL NOTE

This bibliography contains under the various subject headings references to the important primary sources of statistical information for the United States. Secondary sources have been referred to if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. One-time studies presenting compilations or estimates for several years or new types of data not available in regular series are included.

Much valuable information will also be found in State reports and in reports for particular commodities, industries, or similar segments of our economic and social structure. However, because of the large number of such references, they are not included here.

Section references on the right hand side of each page indicate that data in the report cited appear in the Statistical Abstract. Where current reports and a summary volume are both cited in the bibliography the section reference often appear opposite the summary volume only. Reference to the section indicated will enable the user to ascertain the type of information presented in the original source. However, it should not be assumed that all of the subjects from that source are summarized in the Abstract.

The location of the publisher of the report is given except for Federal governmental agencies located in Washington. Major inquiries, such as the Census of Population, are referred to by name rather than by specific volume reference under the various topic headings. The final reports of the Sixteenth Census, which include those on the Censuses of Agriculture, Business, Manufactures, Mineral Industries, Population, and Housing, are listed at the end of this bibliography.

SIXTEENTH DECENNIAL CENSUS OF THE UNITED STATES

LIST OF FINAL REPORTS

Each report of a volume in this list is a separate book or pamphlet. Preliminary bulletins, which were issued in advance of final reports, are not included in the list]

Structure.

I: Farms and Farm Property, with Related Information for Farms and Farm Operators, Livestock and Livestock Products, and Crops Statistics for Counties (6 parts).

Part 1. New England, Middle Atlantic and East North Central States.

Part 2. West North Central States.

Part 3. South Atlantic States.

Part 4. East South Central States.

Part 5. West South Central States.

Part 6. Mountain and Pacific States.

II: Value of Farm Products; Farms Classified by Major Source of Income; Farms Classified by Value of Products, Statistics for Counties (3 parts).

Part 1. The Northern States.

Part 2. The Southern States.

Part 3. The Western States.

III: General Report. Statistics by Subjects.

Territories and Possessions.

Reclamation of Agricultural Lands.

Use of Agricultural Lands.

Special Reports:

Special Poultry Report.

Special Cotton Report.

Cross-line Acreage.

Cows Milked and Dairy Products.

Drainage of Alluvial Lands.

Circular and Graphic Presentation of Specified Irrigation Census Statistics.

Abandoned or Idle Farms.

Handbook—Census of Agriculture: 1940.

Ranking Agricultural Counties.

Analysis of Specified Farm Characteristics for Farms Classified by Total Value of Products (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and the Bureau of Agricultural Economics and the Farm Security Administration of the U. S. Department of Agriculture).

Crop-Sharing Contracts.

Share Rent (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and the Bureau of Agricultural Economics, U. S. Department of Agriculture).

Value of Farm Products by Color and Tenure of Farm Operator.

IV.

V: Retail Trade: 1939 (3 parts).

Part 1. United States Summaries and General Analyses.

Part 2. Commodity Sales and Analysis by Sales Size.

Part 3. Kinds of Business by Areas, States, Counties and Cities.

Business—Continued.

Vol. II: Wholesale Trade: 1939.

Vol. III: Service Establishments; Places of Amusement; Hotels; Tourist and Tourist Camps—1939.

Vol. IV: Construction: 1939.

Vol. V: Distribution of Manufacturers' Sales: 1939.

Geography.

Areas of the United States: 1940.

Unincorporated Communities by States, United States.

Manufactures.

Vol. I: Statistics by Subjects.

Vol. II: Reports by Industries (2 parts).

Part 1. Groups 1-10.

Part 2. Groups 11-20.

Vol. III: Reports for States and Outlying Areas.

Other Reports:

Man-Hour Statistics for 171 Selected Industries (Cooperative Bureau of the Census, U. S. Department of Commerce and Bureau of Labor Statistics, U. S. Department of Labor).

Changes in the Distribution of Manufacturing Wage Earners 18 (Cooperative Study—Bureau of the Census, U. S. Department of Commerce and Bureau of Agricultural Economics, U. S. Department of Agriculture).

Mineral Industries.

Vol. I: General Summary and Industry Statistics.

Vol. II: State and County Statistics.

Population.

Vol. I: Number of Inhabitants.

Vol. II: Characteristics of the Population (7 parts).

Part 1. U. S. Summary, Alabama-District of Columbia.

Part 2. Florida-Iowa.

Part 3. Kansas-Michigan.

Part 4. Minnesota-New Mexico.

Part 5. New York-Oregon.

Part 6. Pennsylvania-Texas.

Part 7. Utah-Wyoming.

Vol. III: The Labor Force (5 parts).

Part 1. United States Summary.

Part 2. Alabama-Indiana.

Part 3. Iowa-Montana.

Part 4. Nebraska-Oregon.

Part 5. Pennsylvania-Wyoming.

Vol. IV: Characteristics by Age (4 parts).

Part 1. U. S. Summary.

Part 2. Alabama-Louisiana.

Part 3. Maine-North Dakota.

Part 4. Ohio-Wyoming.

Other reports:

Educational Attainment of Children by Rental Value of Home.

Institutional Population 14 Years Old and Over.

Comparative Occupation Statistics for the United States, 1870-194

Estimates of Labor Force, Employment, and Unemployment in the U. S., 1940 and 1930.

Characteristics of the Nonwhite Population by Race.

ation—Continued.

er reports—Continued.

ternal Migration, 1935 to 1940.

Color and Sex of Migrants.

ate of Birth of the Native Population.

ativity and Parentage of the White Population.

General Characteristics.

Country of Origin of Foreign Stock.

Mother Tongue.

fferential Fertility, 1940 and 1910.

Fertility for States and Large Cities.

Standardized Fertility Rates and Reproduction Rates.

Women by Number of Children Under 5 Years Old.

Women by Number of Children Ever Born.

ie Labor Force (Sample Statistics).

Wage or Salary Income in 1939.

Employment and Personal Characteristics.

Education, Occupation, and Household Relationship of Males 18 to 44 Years Old (prepared in cooperation with the Special Service Division of the War Department).

Characteristics of Persons Not in the Labor Force.

Usual Occupation.

Industrial Characteristics.

Occupational Characteristics.

Employment and Family Characteristics of Women.

amilies (Including Housing Data).

General Characteristics.

Types of Families.

Employment Status.

Family Wage or Salary Income in 1939.

tenure and Rent.

ncome and Rent.

Characteristics of Rural Farm Families.

ize of Family and Age of Head.

f.

: Data for Small Areas (2 parts).

t 1. U. S. Summary and Alabama-Nebraska.

t 2. Nevada-Wyoming.

plement: Block Statistics for Cities.

I: General Characteristics (5 parts).

t 1. U. S. Summary.

t 2. Alabama-Indiana.

t 3. Iowa-Montana.

t 4. Nebraska-Pennsylvania.

t 5. Rhode Island-Wyoming.

II: Characteristics by Monthly Rent or Value (3 parts).

t 1. U. S. Summary.

t 2. Alabama-New Hampshire.

t 3. New Jersey-Wyoming.

V: Mortgages on Owner-Occupied Nonfarm Homes (3 parts)

t 1. U. S. Summary.

t 2. Alabama-New York.

t 3. North Carolina-Wyoming and Supplements—A. Homes Built in 1935-40 and B. Homes Occupied by Nonwhite Owners.

Housing—Continued.

Other reports:

Characteristics by Type of Structure.

Index of Reports.

Vital Statistics.

Vital Statistics Rates in the United States, 1900–1940.

Vital Statistics of the United States—Supplement, 1939–40.

United States Life Tables and Actuarial Tables, 1939–1941.

General Censuses and Vital Statistics in the Americas (Prepared by the C
Library Project which is sponsored jointly by the Bureau of the Censu
the Library of Congress).
